J.- F.- B. CHARRIÈRE: THE MAN BEHIND THE "FRENCH" GAUGE

Kenneth V. Iserson, MD, FACEP

Section of Emergency Medicine, University of Arizona College of Medicine, Tucson, AZ 85724
Reprint address: Kenneth V. Iserson, MD, FACEP, Section of Emergency Medicine,
University of Arizona College of Medicine, Tucson, AZ 85724

□ **Abstract**—Joseph-Frédéric-Benoît Charrière, a 19th century Parisian maker of surgical instruments, has by virtue of his ingenuity and advanced thinking, continued to have his presence felt in medicine throughout the 20th century. His most significant accomplishment was the development of a uniform, standard gauge specifically designed for use in medical equipment such as catheters and probes. Unlike the gauge system adopted by the British for measurement of needles and intravenous catheters, Charrière's system has uniform increments between gauge sizes (1/3 of a millimeter), is easily calculated in terms of its metric equivalent, and has no arbitrary upper end point. Today, in the United States, this system is commonly referred to as French (Fr) sizing. In addition to the development of the French gauge, Charrière made significant advances in ether administration, urologic, and other surgical instruments, and the development of the modern syringe.

□ **Keywords**—Charrière; French gauge; medical equipment; surgical equipment; ether anesthesia; urology

In the first half of the 19th century, the British, in the throes of the industrial revolution, were still trying to adapt an arbitrary sizing system (the Stub's Gauge which was adapted to the manufacture of needles and catheters only in the 20th century) in order to standardize their manu-

facture of metal wires.¹ Meanwhile, the French had developed a uniform, standard gauge based on the metric system. This gauge was specifically designed for use in medical equipment, such as catheters and probes. The famous Parisian maker of surgical instruments, Joseph-Frédéric-Benoît Charrière (Figure 1), developed this measurement system. Today, in the United States, this system is commonly referred to as French (Fr) sizing.

Charrière was born in 1803 in Cerniat in Gruyere, Fribourg Canton, Switzerland. At the age of 13, he was sent to Paris and apprenticed as a cutler (a maker of cutting instruments, such as knives). Four years later he became both a master cutler and the owner of his own business after the untimely and mysterious drowning of his former teacher, whose business he acquired. Charrière quickly developed a reputation among Paris surgeons as a skilled and innovative maker of surgical instruments. Part of this reputation stemmed from an incident that occurred shortly after he opened his business.

Charrière was hammering the metal and sharpening the lancets and knives, when into his boutique flew a young man. By his white apron, his fine featured and intelligent face, and by his distinguished build he could recog-

Medical Classics — is an ongoing feature of *JEM*, focusing on "classic" contributions to emergency medicine. This section is routinely authored by *George Sternbach, MD* Stanford University Medical Center.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
