Sokalan® Acrylic Polymers

Key Applications defoamers; anti-redeposition aids; dispersant; scale inhibitors

Product Description These water-soluble copolymers serve as defoamers, anti-redeposition aids, dispersant, scale inhibitors, and bulk density modification for applications such as laundry detergent, printing ink, ceramics, seawater desalinization, agricultural chemicals, sugar production, and water treatment. Their wide range of chemistries allow for controlled particle size for stability, dust-free handling, compact formulation, accurate metering, quick dissolution, and compact storage.
