(54) Abstract Title
Web page downloading

(57) A method of using a "markup language", such as HTML, browser, in which a page is loaded into display memory, the user selects multiple URLs from those displayed on the page, and the browser preloads pages corresponding to the URLs into a cache without necessarily displaying them, so the user may continue to view the original page. Before preloading a given page, it may update a navigation list with the corresponding URL, and a user may select an entry in this list, directly or via "forward" and "back" GUI buttons, to display immediately.
