15 Ethan Rubin.

16 MR. MILLIKEN: Good morning, your Honor. Tom Milliken  
17 from Perkins Coie on behalf of Coolpad and Yulong. With me is  
18 James Hurt.

19 THE COURT: Thank you. All right. We're back. So  
20 let's get started on the '842.

21 MR. HARTSELL: Your Honor, may I approach?

22 THE COURT: Yes. Go ahead.

23 MR. HARTSELL: Good morning, your Honor. Again this  
24 is Steven Hartsell on behalf of Bell Northern Research. The  
25 '842 patent was developed by engineers at Broadcom and filed in

1 January of 2010. The '842 patent is a continuation of U.S.  
2 Patent Number 7,646,703 which claims priority to at least  
3 July 2004. The '842 patent is directed to long training  
4 sequences with minimum peak-to-average power ratios, and today  
5 I would like to provide some background and a few common steps  
6 that I hope the Court would find useful in today's discussion.

7 The '842 patent is taught against the backdrop of the  
8 802.11 WiFi standard which is promulgated by IEEE, which is the  
9 Institute for Electrical and Electronic Engineers. This  
10 standard governs how different wireless devices are designed  
11 and how they communicate with one another. Now as technology  
12 evolves, the 802.11 standard has been amended periodically to  
13 add additional capabilities, usually resulting in faster speeds  
14 and better coverage.

15 As you can see on our slide, in 1999, the 802.11  
16 standard was amended to implement OFDM, which stands for  
17 orthogonal frequency-division multiplexing, to increase data  
18 throughput. I'm going to show you what that means on slide 5.  
19 At the top, you can see this is how data was transmitted OFDM.  
20 Basically we have single carriers that are separated. When  
21 OFDM is implemented, the carrier waves are essentially smushed  
22 together allowing you to send more data found within the given  
23 bandwidth. As you can see on the OFDM, there's an overlap in  
24 the subcarriers which is necessary to achieve high data rates.

25 In slide 6, each colored peak is a subcarrier which

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS
