(1)	Claims 26-2811	13

1. I, Laird Forrest, Ph.D., have been retained by Mylan Institutional LLC ("Mylan") in the matter set forth in the caption above. I submitted previously an expert declaration in this matter, dated December 19, 2019, which was designated Exhibit 1002 ("First Declaration"). In that declaration, I showed that claims 1-31 of U.S. Patent No. 8,114,833 to Pedersen et al. ("the '833 patent") (Ex. 1001) were either anticipated by the prior art or would have been obvious to a person of ordinary skill in the art at their priority date. *See generally* Ex. 1002.

2. My qualifications, previous testimony, and compensation are provided in my Opening Declaration. An updated *curriculum vitae* is attached hereto as Exhibit A.

3. I submit this reply expert declaration in further support of my opinions regarding the '833 patent, and in reply to certain opinions set forth in the September 18, 2020 Declaration of Peter M. Tessier, Ph.D. ("Tessier Declaration"), filed on behalf of the Patent Owners, which was designated Exhibit 2022. To the extent I do not expressly address a point made by Dr. Tessier, it does not mean that I agree with it.

4. The scope of my work and compensation remains the same since I submitted my original declarations in this proceeding. I was retained as a technical expert to provide opinions related to the patent at issue. My compensation is not

dependent upon the outcome of the proceedings or my opinions given. I have no current affiliation with Novo Nordisk A/S or the inventors of the patent at issue.

I. LEGAL STANDARDS

5. In addition to the legal principles detailed in my previous declaration, I have been informed by counsel regarding relevant legal principles.

6. Counsel has informed me that an international patent application filed on or after November 29, 2000 but prior to March 16, 2013, that designates the United States, and is published in English under the Patent Cooperation Treaty (PCT) is usable for prior art purposes as of its international filing date. If the international patent application claims priority to one or more U.S. provisional application, the international patent application is usable for prior art purposes as of filing date of the earlier filed provisional application provided at least one claim of the international application is supported by the description of the provisional application.

7. Counsel has also informed me that a patent owner can submit evidence that it invented the claimed invention prior to the earliest date that a reference is usable for prior art purposes (i.e., the earliest priority date). I understand that one way to show prior invention is to demonstrate an actual reduction to practice prior to the earliest priority date. To do so, I understand that Patent Owner must not only show that they had prepared a formulation that meets every limitation of the claimed

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
