TABLE OF CONTENTS

I.	Introduction.....	1
II.	Professional and educational background	2
III.	Basis for my opinions	4
IV.	Summary of my opinions	6
V.	Person of ordinary skill in the art	8
VI.	The '620 patent.....	9
VII.	Claim construction.....	9
VIII.	Segal does not enable the azelastine/fluticasone combination formulations of claims 1 and 25.	11
IX.	As of June 2002, a POSA would have been led away from combining azelastine and fluticasone into a fixed-dose combination formulation, and a POSA would not have had a reasonable expectation of success.....	19
	A. A POSA would not have been motivated to combine azelastine and fluticasone into a fixed-dose combination because of the difficulties in doing so and the lack of guidance in the prior art.	20
	B. The prior art taught that fluticasone would aggregate when co-formulated with another active ingredient, which would have led a POSA away from combining azelastine and fluticasone into a fixed-dose combination formulation and would have undercut any reasonable expectation of success.	23
	C. Cramer's Example III would have been led away from combining azelastine and fluticasone into a fixed-dose combination, and would have undercut any reasonable expectation of success.	24
	i. Dr. Govindarajan's and Dr. Herpin's testing confirms Ms. Malhotra's findings.....	25
	ii. Routine experimentation would not remedy the shortcomings of Example III.....	29
X.	As of June 2002, a POSA would have been led away from using the excipients recited in claims 42-44 in an azelastine/fluticasone combination formulation, and would not have had a reasonable expectation of success. .	31
	A. The prior art would have led a POSA away from using the thickening agents "microcrystalline cellulose and sodium carboxymethyl cellulose" as recited in claims 42-44.....	31

B.	The prior art would have led a POSA away from employing a three-preservative combination of "edetate disodium" / "benzalkonium chloride" / "phenyl ethyl alcohol" as recited in claims 42-44.....	34
C.	The prior art would not have led a POSA to use "glycerin" as the isotonicity agent as recited in claims 42-44.	36
XI.	Objective indicia of non-obviousness	38
A.	Dymista® and Duonase embody the challenged claims.....	38
B.	The Duonase Imitator Products embody the challenged claims	39
C.	Meda was skeptical that an azelastine/steroid combination formulation could be formulated and developed.	52
D.	Meda's failure to develop an azelastine/fluticasone combination formulation.	54
E.	Dymista®, Duonase, and the Imitator Products are unexpectedly "suitable for nasal administration."	56
XII.	Conclusion	57

I, Hugh Charles David Smyth, do declare as follows:

1. I am over the age of eighteen (18) and otherwise competent to make this declaration.

I. Introduction

2. I have been retained as an expert witness by Cipla Ltd. ("Cipla") in the above *inter partes* review matter concerning U.S. Patent No. 8,168,620 ("the '620 patent") (EX1001) that was filed by Petitioner Argentum Pharmaceuticals LLC ("Argentum"). Counsel has informed me that Argentum has challenged the patentability of claims 1, 4-6, 24-26, 29, and 42-44 (collectively "the challenged claims").

3. I have been asked by Cipla to review Argentum's Petition and the declaration submitted on behalf of Argentum by Dr. Maureen Donovan, and to respond to those documents to the extent that their contents fall within my expertise.

4. I am being compensated for my time in connection with this *inter partes* review matter at a rate of \$600 per hour, and my compensation does not depend upon the ultimate outcome of this case. I will also be compensated for any reasonable expenses, including travel costs incurred in conducting activities at counsel's request.

II. Professional and educational background

5. I am presently an Associate Professor with Tenure (Hamm Endowed Faculty Fellow) in the College of Pharmacy at the University of Texas, Austin. I have held this position since 2011. I am also an Adjunct Associate Scientist at the Lovelace Respiratory Research Institute in Albuquerque, New Mexico, a position I have held since 2009. From 2009 to 2011, I served as an Assistant Professor in the College of Pharmacy at the University of Texas, Austin. From 2005 to 2009, I was an Assistant Professor in the College of Pharmacy at the University of New Mexico. And from 2004 to 2005, I was a Research Assistant Professor in the College of Pharmacy at the University of North Carolina, Chapel Hill.

6. I received a Bachelor of Pharmacy in 1995 from the University of Otago, in Dunedin, New Zealand. In 1997, I earned a Post Graduate Diploma in Pharmacy, with Distinction, from the University of Otago. In 2000, I received my Ph.D. in Pharmaceutical Sciences from the University of Otago. My thesis topic was the "Investigation of Electrically Assisted Drug Delivery in the Percutaneous Delivery of Peptides." From 2001 to 2003, I was a Post-Doctoral Fellow at the School of Pharmacy at the University of North Carolina, Chapel Hill.

7. My current research focuses on the development of novel methods for drug delivery including nasal, inhalation, transdermal, ophthalmic, and oral delivery systems for a variety of diseases.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
