Dear Daewon,

thanks for bringing up this issue. If I understand your proposal corerctly you propose to map the ACK/NAK next to the RS and let the CQI be mapped to resources without no special treatment. This could considerably simplify the description in 36.212. Such an approach also seems to make sense performance-wise; the reason to map control next to RS was to improve the performance at high speeds (although we did not have a lot of discussion on this, the decisions was taken quite quickly in Athens). In our view, ACK/NAK is more important than CQI, especially at high speeds where the CQI anyway tends to be less useful due to the rapidly varying channel and the delays in teh CQI reports. Hence, you proposal seems to make sense.

Stefan

Subject: [LTE] PUSCH multiplexing

Dear all,

In our understanding, exact rule of multiplexing ACK/NACK and CQI on PUSCH should be define in order to complete the part of the uplink control

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
