

Declaration of Rachel J. Watters on Authentication of Publication

I, Rachel J. Watters, am a librarian, and the Director of Wisconsin TechSearch (“WTS”), located at 728 State Street, Madison, Wisconsin, 53706. WTS is an interlibrary loan department at the University of Wisconsin-Madison. I have worked as a librarian at the University of Wisconsin library system since 1998. I have been employed at WTS since 2002, first as a librarian and, beginning in 2011, as the Director. Through the course of my employment, I have become well informed about the operations of the University of Wisconsin library system, which follows standard library practices.

This Declaration relates to the dates of receipt and availability of the following:

Multiprocessors and Parallel Processing. (1974). Enslow Jr., Philip H. (Ed.) New York, NY: John Wiley & Sons.

Standard operating procedures for materials at the University of Wisconsin-Madison Libraries. When a volume was received by the Library, it would be checked in, added to library holdings records, and made available to readers as soon after its arrival as possible. The procedure normally took a few days or at most 2 to 3 weeks.

Exhibit A to this Declaration is true and accurate copy of the front matter of *Multiprocessors and Parallel Processing* (1974), from the University of Wisconsin-Madison Library collection. Exhibit A also includes a true and accurate copy of a page from this volume showing that this book was part of the collection of the Engineering Library at the University of Wisconsin-Madison. Exhibit A also includes a true and

Declaration of Rachel J. Watters on Authentication of Publication

accurate copy of a back page of the volume, showing several date stamps, beginning with the date “JA 19 75.” These stamps are records of when the book was physically checked out by a library patron. The designation of “JA 19 75” indicates that this book was checked out some time before January 19, 1975 to a library patron and due back to the library by January 19, 1975. Based on this information, the date stamp on the back cover page indicates *Multiprocessors and Parallel Processing* (1974) was received by the Engineering Library at University of Wisconsin-Madison on or before January 19, 1975, and made available to library patrons on or before January 19, 1975.

I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
