

DECLARATION OF PAMELA STANSBURY

I, Pamela Stansbury, declare:

1. I am an Administrative Supervisor of the Cornell University Library, and specifically the Original Cataloging Unit, located at Cornell University, Ithaca, New York 14853. I am knowledgeable regarding the policies and procedures of the Library as they relate to the receipt, cataloging, and tracking of books and I have personal knowledge of the facts set forth below. I am familiar with these procedures because I have been employed by the Library since 1982, where I began in Technical Services as a Serials Assistant, then a copy cataloger in the Cataloging Unit in 1984. I have held my current position since the mid-1990s.
2. The Cornell Library holds an original copy of the monograph, *Tutorial, interconnection networks for parallel and distributed processing / Chuan-lin Wu and Tse-yun Feng. IEEE Computer Society Press, 1984*. I have been asked for information about *Tutorial, interconnection networks for parallel and distributed processing* – specifically when this item was first made publicly available by the Cornell Library. From my review of the Library's records and my knowledge of the Library's standard procedures, *Tutorial, interconnection networks for parallel and distributed processing* was cataloged and publicly available at the Engineering Library, in its public stacks, shelved by its Library of Congress classification system number within one or two days of February 15, 1985. A date stamp of "FEB 15 1985" inside the front cover indicates that it arrived at the Engineering Library on February 15, 1985 and at the point would be made available to the public.
3. My opinion is based on the date stamp inside the front cover of the document, and my knowledge of the Library's standard procedures relevant to date stamping, cataloging, and shelving items. I have not seen any indication that *Tutorial, interconnection networks for parallel and distributed processing* would have been an exception to the Library's standard practice. The Library maintains a searchable and publicly accessible catalog of its publications. Therefore, as of February 15, 1985 for *Tutorial, interconnection networks for parallel and distributed processing* any member of the public could have located this item by searching our catalog by title, author, or subject matter.

I declare that all statements made herein of my knowledge are true, and that all statements made on information and belief are believed to be true, and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.
