

IT MAKES A BOLD STATEMENT.
WITHOUT UTTERING A WORD.

The designers at Hyundai haven't exactly been playing it safe lately. The concept vehicles they've unveiled at the world's premier auto shows over the past few years have been jaw-dropping show-stoppers.

The new, totally redesigned 2010 Hyundai Tucson is a clear reflection of those bold design choices.

Tucson's new look is sleek and aggressive, with sculpted hood creases, wrap-around headlights and an available panoramic sunroof. But it's what's inside that you'll find most striking. Room. Whether it's headroom and legroom for you and your passengers, or cargo room to carry out your plans, Tucson is surprisingly spacious inside.

After they created all that space, our designers filled it with advanced comfort and safety features. Like six standard airbags, standard Electronic Stability Control with Traction Control System, and ABS aided by Brake Assist and Electronic Brake-force Distribution. Under the hood, our engineers gave Tucson a 2.4L Theta 2 engine delivering up to 176 horsepower and up to an estimated 31 MPG on the highway. And under it all, there's an available All Wheel Drive system.
