MICROSOFT CORPORATION,
Petitioner,

v.

UNILOC 2017 LLC,
Patent Owner.

U.S. Patent No.: 6,836,654
Issued: Dec. 28, 2004
Application No.: 09/739,507
Filed: Dec. 18, 2000

Title: ANTI-THEFT PROTECTION
FOR A RADIOTELEPHONY DEVICE

————————————

<u>DECLARATION OF STEVEN HARRIS</u>

1.   I, Steven Harris state and declare as follows:

2.   I am over 18 years of age and am competent to make this Declaration. I make this Declaration based on my own personal knowledge, based on my knowledge and review of the business records and practices of the University of Nevada-Reno Library ("Library").

3.   I am currently employed as the Assistant Dean for Collections and Knowledge Access Services at the University of Nevada-Reno. I have been employed in this position since 2013.

4.   I obtained a Master's Degree in Library Science in 1991, and since that time, I have been employed with academic libraries at various universities across the United States.

5.   Through my professional experience, I have become knowledgeable about the Library's normal business practices with respect to how the Library receives, catalogs, indexes, shelves, and makes available to the public its books, journals, periodicals, and other collections.

6.   Attached as Exhibit A to this Declaration is a true and accurate copy of the paper titled "Communication Device Inactivity Password Lock," by Charles P. Schultz, Motorola Technical Developments, v. 29, Nov. 1996. Exhibit A, pp. 14-15. The exhibit includes photographs of the Library's black bound edition that holds volumes 27-29 of Motorola Technical Developments. Exhibit A, pp. 7, 17.

7.   The Library has continuously maintained a cataloging system such that any member of the public could search for the offerings at the Library. Motorola Technical Developments was part of this system. The Library's records indicate that the Library regularly received, cataloged, and shelved Motorola Technical Developments from 1983 (volume 3) to 2000 (volume 42).

8.   In the 1996 timeframe, the Library's cataloging and shelving procedure for Motorola Technical Developments periodical included placing the volume on the public shelf upon receipt from the publisher. It was further the Library's practice to send out for binding three volumes at a time. As noted above, pages 7 and 19 of Exhibit A are photographs of the physical binder at the Library that contains the Schultz paper identified in paragraph 6.

9.   The Library has maintained and used in its ordinary course of business an automated library catalog to track the Library's collections since prior to 1996. Attached as Exhibit B to this Declaration is a true and accurate screen shot from the Library's automated library catalog, showing that a record was created on July 18, 1997 for volumes 27-29 of Motorola Technical Developments. The July 18, 1997 date represents the date when the Library received the physical bound collection of volumes 27-29 from the binding company.

10.   It was the Library's practice to send out the loose three volumes for binding after receiving the next one in the collection. That is, volumes 27-29 were

sent out for binding after receiving volume 30 of Motorola Technical Developments. Thus, volume 30 was received prior to July 18, 1997 (the date the bound collection of volumes 27-29 were received back from the binding computer).

11.   Based on the Library's practice at the time, the Library would re-shelve the bound collection as soon as possible upon receipt of the bound collection, and typically within one or two business days. Thus, the bound collection that included Exhibit A would have been back on the public shelves before July 31, 1997.

12.   It was also the Library's normal practice to date stamp each individual volume upon receipt from the publisher. Here, the date stamp of volume 29 has become illegible. However, based on all available information, the Library received, shelved, and made Exhibit A available to the public, prior to July 18, 1997 because as noted above, the Library shelved volume 29 prior to receiving volume 30.

I, Steven Harris, do hereby declare and state, that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.

fastcase
Smarter legal research.
