

# U.S. Patent No. 9,451,084

U.S. Patent No. 9,451,084: Claim 1

"1. A system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands uttered by users into a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device, the system comprising:"

[Ipre] 1. A system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands uttered by users into a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device, the system comprising:

The Webley System is a system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands uttered by users into a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device.

The Webley System, which included the Webley Assistant, was a virtual voice assistant application that was created by Webley Inc., and predates U.S. Provisional Patent Application No. 60/174,000 ("Webley Provisional") which has a priority date of January 4, 2000.

See, e.g., Ex. 2029.

U.S. Patent No. 9,451,084: Claim 1

"1. A system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands from a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device, the system comprising:"

*See, e.g.,* Ex. 2030.

The Webley Assistant accepted spoken commands from users and carried out the users instructions.

U.S. Patent No. 9,451,084: Claim 1

"1. A system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands from a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device, comprising:"

## Frequently Asked Questions

### How do I use Webley?

Simply.

Unlike other older systems that require tedious training with expensive equipment, Webley has been designed to be intuitive - he doesn't have to be trained to identify your voice. He is intelligent enough to understand your spoken commands and to carry out your instructions. Some members prefer to use their touch tone key pad to rapidly insert commands - this feature allows for total freedom and flexibility in using The Webley Network.

In addition, Webley works over the Web, you get secure internet access to the Webley application.

From here you can access your voice mail, manage your contact list, you also have access to all of your call records and billing information.

© 1999 Webley Systems, Inc.

*See, e.g.,* Ex. 2031.

The Webley Assistant is based on source code that predates the Kovatch reference. For example, the main source code file for the Webley Assistant, has a date of last being modified 12/31/1999.

U.S. Patent No. 9,451,084: Claim 1

"1. A system for acquiring information from one or more sources maintaining a listing of web sites by receiving speech commands from a voice-enabled device and for providing information retrieved from the web sites to the users in an audio form via the voice-enabled device, the system comprising:"

Ex. 2025 at lines 1-18.

Further, the Webley System retrieves information from pre-selected web sites by uttering commands to a voice-enabled device and for providing to users retrieved information in an audio form via said voice-enabled device. For example, the mc\_vm.c source code file includes a “getWeather()” function that further calls a function using weather as an argument:

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
