

# CVS Source Code - Activity Log

The following records were created with a tool called cvsps (<http://cvsp.s.sourceforge.net/>) which aggregates all files that were committed at once. By using this for specific dates and users, a log of activity can be generated.

The command was run on the repositories that can be seen in this screenshot with two exceptions:

File	Rev.	Age	Author	Last log entry

<a href="#">build-rpm.sh</a>	1.1	10 years	szakovyrya	Initial commit

Show only files with tag:  Module path or alias:

The exceptions were:

- <http://cvs.webley/cgi-bin/cvsweb.cgi/old/>
- <http://cvs.webley/cgi-bin/cvsweb.cgi/vail-pre072500/>

Once all code was checked out, this command was used to analyze the commit metadata in each repository to build the record for each user:

```
cvsp --no-rlog -a alex -d '1999/12/01 00:00:00' -d '2000/01/10'
```

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
