Subject:	Re: protocol

I am not sure that understand you correctly.
Could you please show me an exaple of spaces between sentences because
I pass parsed text and if you need to make one whole bunch of it you could simply
concatenate all third parameters with as many spaces between them as possible.
Maybe I think about other thing.
Valery
BTW: For phone number I used such sintax:
<!--webley name="phone" value="8884446400" text="Webley-->888.4.WEBLEY<!--webley-->
