

UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE PATENT TRIAL AND APPEAL BOARD

APPLE INC.,
Petitioner

v.

COREPHOTONICS, LTD.,
Patent Owner

IPR2020-00906
U.S. Patent 10,225,479

PETITIONER'S REPLY

Table of Contents

I. Introduction.....1

II. Claim Construction.....1

 A. “to find translations between matching points in the images to calculate depth information and to create a fused image suited for portrait photos” (claim 19)1

III. Claims 19 and 20 are obvious over the combination of Parulski, Ogata, Kawamura, and Soga.....4

 A. Patent Owner does not dispute that “a camera controller configured to ... *to find translations between matching point in the images to calculate depth information and to create a fused image suited for portrait photos*” is satisfied under Petitioner’s construction.5

 B. Patent Owner relies on an incorrect premise that Ground 1 in the Petition requires Kawamura and Ogata to be used in a miniature camera module.5

 C. A POSITA would have considered the Kawamura and Ogata designs in selecting lenses for Parulski’s digital camera.8

 1. A POSITA would have scaled Kawamura and Ogata for a digital camera, not a miniature camera module.....8

 2. Patent Owner’s list of miniature lens requirements should be rejected because they are based on improperly limiting Parulski to miniature camera modules using miniature lenses. 11

 3. A POSITA would have looked to Kawamura among other lens designs when considering how to implement Parulski's camera.12

 D. Patent Owner’s analysis is incorrect because it is based on a POSITA’s understanding of technology in 1981 and incorrect understanding of ongoing relevance of older lens designs.13

 E. Lens design software analysis supports combining Parulski with Ogata and Kawamura.15

 1. Patent Owner fails to provide any optical design software analysis to support his opinion, which a POSITA at the time of the invention would have performed to evaluate prior art. ..15

2.	To the extent that Parulski is limited to miniature camera modules, modifications or adjustments would have been within the level of a POSITA to accommodate the teachings of Kawamura and Ogata in Parulski’s camera.	15
IV.	Claims 21 and 22 are obvious over the combination of Parulski, Ogata, Kawamura, Soga, and Morgan-Mar.	16
V.	Secondary Considerations	17
A.	No nexus.....	18
1.	Patent Owner is not entitled to a presumption of nexus.	18
2.	Patent Owner fails to prove nexus.	19
B.	Praise/licensing lacks nexus and is self-serving.	22
C.	Patent Owner did not show commercial success.	24
D.	No failure of others.....	24
E.	No evidence of copying.....	25
VI.	Conclusion	26
VII.	Certificate of Word Count	27
	CERTIFICATE OF SERVICE	28

PETITIONER'S EXHIBIT LIST

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
