Internet Archive
300 Funston Avenue
San Francisco, CA 94118

AFFIDAVIT OF CHRISTOPHER BUTLER

1. I am the Office Manager at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to surf more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a list of available dates. The visitor may select one of those dates, and then begin surfing on an archived version of the Web. The links on the archived files, when served by the Wayback Machine, point to other archived files (whether HTML pages or images). If a visitor clicks on a link on an archived page, the Wayback Machine will serve the archived file with the closest available date to the page upon which the link appeared and was clicked.

4. The archived data made viewable and browseable by the Wayback Machine is compiled using software programs known as crawlers, which surf the Web and automatically store copies of web files, preserving these files as they exist at the point of time of capture.

5. The Internet Archive assigns a URL on its site to the archived files in the format [http://web.archive.org/web/\[Year in yyyy\]\[Month in mm\]\[Day in dd\]\[Time code in hh:mm:ss\]/\[Archived URL\]](http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]). Thus, the Internet Archive URL <http://web.archive.org/web/19970126045828/http://www.archive.org/> would be the URL for the record of the Internet Archive home page HTML file (<http://www.archive.org/>) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date assigned by the Internet Archive applies to the HTML file but not to image files linked therein. Thus images that appear on a page may not have been archived on the same date as the HTML file. Likewise, if a website is designed with "frames," the date assigned by the Internet Archive applies to the frameset as a whole, and not the individual pages within each frame.

6. Attached hereto as Exhibit A are true and accurate copies of printouts of the Internet Archive's records of the HTML files or PDF files for the URLs and the dates specified in the footer of the printout (HTML) or attached coversheet (PDF).

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE:

9/17/19

Christopher Butler

ELITE

BDP-33FD

PIONEER ELITE 1080P STREAMING BLU-RAY DISC™ PLAYER

PERFORMANCE FEATURES

- › **Spectacular 1080p Picture Quality:** The BDP-33FD provides up to 1920 x 1080p resolution for unrivaled picture quality. And with True 24fps, you'll see your movies as the director intended.
- › **Simultaneous HDMI® & Component Video Output:** Enjoy High Definition Video from both the HDMI and Component Video connections. (Component Video limited to 1080i Resolution.)
- › **Online Streaming Content:** Enjoy online content from YouTube and read RSS Feeds when connected to the Internet. Additional services available soon.
- › **iPhone®/iPod® Touch Remote Control:** Using our free iControlAV application (available for download on the Apple® App Store™) users can control most major functions of the BDP-33FD with their iPhone/iPod Touch.
- › **RS232/IP Control:** The BDP-33FD allows for control over most major functions via the RS232/Ethernet port making it perfect for custom installation applications.
- › **Armored Chassis Construction:** The BDP-33FD has been designed and constructed to provide the best audio and video in its class. A double layered chassis, drive stabilizers, shock absorbers all aid in providing superior audio and video playback.

- › **Superior Quality Audio Components Selection:** The BDP-33FD uses superior quality audio parts to reproduce soundtracks and music with the great precision. A high quality AC cable is also supplied.
- › **Deep Color:** The BDP-33FD supports 36-bit* Deep Color, offering high definition images with superb color detail.
- › **HDMI Precision Quartz Lock System (PQLS) Jitterless Transmission (Bit-stream):** By HDMI connection with a compatible Pioneer A/V receiver, A/V sources such as Blu-ray Discs and DVDs, as well as CD music are precisely reproduced with minimum jitter.
- › **Internal Audio Decoders:** The BDP-33FD features internal decoding of all advanced audio formats including Dolby® Digital Plus, Dolby TrueHD, DTS-HD® High Resolution, and DTS-HD Master Audio.
- › **BD-Live™ Compliant (Profile 2.0):** Enjoy special disc contents in Picture-in-Picture form, and also download additional content from the internet to optional USB memory, such as the director's interview and languages not contained on the disc.**
- › **Wireless Ready:** An optional 802.11n wireless adapter (AS-WL100) is available allowing access to online wireless content and firmware upgrades without the need to run additional cables to your Blu-ray player.
- › **Auto Firmware Notification:** When connected to a live internet connection the BDP-33FD will automatically notify you of any new firmware availability.
- › **Dual USB Inputs:** A front and Rear USB input are provided to accommodate optional BD-Live Storage, our optional AS-WL100 Wireless internet adapter, or JPG/MP3 media playback.
- › **Multi-Format Compatibility:** You can play high definition DVD discs recorded by digital video cameras in AVCHD format. You can also play BD-R/RE, DVD-R/RW, etc. recorded using Blu-ray Disc recorders or DVD recorders as well as CD/CD-R.

DOCKET ALARM

Find authenticated court documents without watermarks at docketalarm.com.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
