Logitech Harmony 900

Score Details

“We think the 900’s RF features are what really make it a better value than the pricier model 1100.”

Touchscreen display; supremely easy to program; rechargeable battery; RF feature and

IR blasters allow you to keep your gear out of sight

Expensive; not as sexy as the pricier Harmony 1100; free telephone tech support limited to 90 days

Summary

[Harmony 1100](#) universal remote last April. But the reality is that while that touchscreen device is supremely easy to program and drop-dead sexy to boot, it costs as much as the small HDTV or entry-level A/V receiver you might use it to control.

On the flip side, Logitech's Harmony 900 has a smaller touchscreen, and its bulkier form factor renders it something of a wallflower compared to

offers the same easy programmability, includes robust RF capabilities that are optional on the 1100 model, and is priced \$100 lower, making it a much better value overall.

Design

The Harmony 900's rectangular design and physical transport-control buttons and numeric keypad make it look much more like a typical remote control than the square [Harmony 1100](#). In some ways, however, the dedicated buttons (which are backlit to render them usable in a darkened room) make the 900 just a little more intuitive to use. If you're watching TV and wish to change channels, for instance, you don't need to call up a numeric keypad on the touchscreen, you just press the buttons.

But we think the 900's RF features are what really make it a better value than the pricier model 1100. In our home theater, all components other than the video projector are mounted in a built-in entertainment center, hidden behind plywood doors that an infrared signal can't penetrate. We use a Niles Audio Remote Control Anywhere kit, which consists of an IR receiver that we mounted on the outside of the entertainment center and five IR emitters for the gear inside the cabinet. This works great, but you must be in the room for the remote to function.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
