SPEC. No. ED-92244A
ISSUE December 27, 2002

SHARP

OPTO-ELECTRONIC DEVICES DIVISION
ELECTRONIC COMPONENTS GROUP
SHARP CORPORATION

SPECIFICATION

DEVICE SPECIFICATION FOR

Infrared Detecting unit for Remote Control

MODEL No.

GP1UV70QS series

Specified for _____

Enclosed please find copies of the Specifications which consists of 12 pages including cover.
After confirmation of the contents, please be sure to send back copies of the Specifications
with approving signature on each.

REFERENCEProduct name : Infrared Detecting unit for Remote ControlModel No. : GP1UV70QS series

1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.
2. When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.

(Precautions)

- (1) This product is designed for use in the following application areas ;

{ • OA equipment • Audio visual equipment • Home appliances
 • Telecommunication equipment (Terminal) }

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.

- (2) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as ;

{ • Transportation control and safety equipment (aircraft, train, automobile etc.)
 • Traffic signals • Gas leakage sensor breakers • Rescue and security equipment
 • Other safety equipment etc. }

- (3) Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;

{ • Space equipment • Telecommunication equipment (for trunk lines)
 • Nuclear power control equipment • Medical equipment etc. }

- (4) Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above three paragraphs.

3. Please contact and consult with a Sharp sales representative for any questions about this product.

REFERENCE

1. Application

This specifications applies to the model marked "O" in the following models of infrared detecting unit for remote control.

The model list of GP1UV70QS series

Application	Model No.	B.P.F. center frequency (TYP)
	GP1UV70QS	40 kHz
	GP1UV700QS	36 kHz
	GP1UV701QS	38 kHz
	GP1UV702QS	36.7 kHz

Main application : TV set, VCR, Radio cassette recorder, Stereo

2. Outline Refer to the attached sheet, Page 8.
3. Ratings and characteristics Refer to the attached sheet, Page 4 to 7.
4. Reliability Refer to the attached sheet, Page 9.
5. Outgoing inspection Refer to the attached sheet, Page 10.

6. Supplement

- This infrared detecting unit for remote control satisfies each performance requirements in para. 3.5, in the standard optical system in Fig.2.
- This product is built-in photodiode.
- Product mass : Approx. 0.7g
- This product shall not contain the following materials.

Also, the following materials shall not be used in the production process for this product.

Materials for ODS : CFC_s, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methyl chloroform)

- Brominated flame retardants
Specific brominated flame retardants such as the PBBO₃ and PBB₅ are not used in this device at all.
- Packing specification : Refer to the attached sheet, Page 11.
- Country of origin : Philippine, Indonesia

7. Notes

1) Transmitting code

When this infrared remote control detecting unit shall be adopted for wireless remote control, please use it with the signal format of transmitter, which total duty ratio D_t (Emitting time $\sum_{N=1}^n t_N$ / Transmitting time for 1 block T) is 40% or less. T_{ON} (Pulse width of the presence of modulated IR) should be 250 μ s or more. In case that the signal format of total duty and T_{ON} is out of above conditions, there is a case that reception distance is much reduced or output is not appeared.

$$D_t = \left(\sum_{N=1}^n t_N / T \right) \times 100 (\%)$$

REFERENCE

2) Transmitter

Please use a light emitting unit (remote control transmitter) taking into consideration such factors as the performances, characteristics and operating condition of the light emitting element and the characteristics of this light detecting unit.

3) Detector face and cleaning

If the surface of detector is smeared with dust or dirt, it may cause faulty operation. Caution shall be taken to avoid this. And do not touch the detector surface. If the surface was smeared, wipe it clean with soft cloth.

If any solvent is needed, Methyl alcohol, Ethyl alcohol, or Isopropyl alcohol should be used.

Please don't carry out washing. Because, after washing the remainder in solvent or flux in this device cause malfunction.

Marking on this device is defaced by washing.

4) Mounting this product

- The shield case shall be grounded on the PCB pattern.

(There are two cases that shield case and GND pin are connected in the shield case, or are not connected in it.)

- It shall not be applied the terminal and case with unnecessary stress.
- Please don't push the detecting side (photodiode) from external.
- In order to prevent electrostatic discharge of integrated circuit, human body and soldering iron, etc. shall be grounded.
- The holes and the slits on the infrared detecting unit shall not be used as the other purpose to maintain its performance.
- When mounting, please mount the external circuit below. (CR filter)

(External parts should be mounted as close as possible to the sensor.)

The circuit constant is a example. It is difference from mounting equipment. Please select it by your mounting equipment.

This device has a transistor as protection element between Vcc and GND to improve anti-static electricity proof.

Please be carefully not to apply exceeding the absolute maximum ratings of applying voltage and continuous high voltage spike noise because there is cases that transistor will be short by secondary breakdown generally.

In order to do difficultly, Please add CR filter (47 Ω(1/10W), 10 μF or more) such as external circuit example above near Vcc.

5) Characteristics of this product

- There is a possibility that noise on output may be caused by environmental condition etc. even if there is no input transmission signal.
- Please shall confirm operation or your actual machine. Because the output pulse width of this product is fluctuated by environmental conditions such as signal format, temperature, distance from transmitter, and so on.

6) Soldering

- In case that this product is kept in high humidity condition, it may be hard to solder, please be careful enough about storage method. Depend on the flux you select, there are different solderabilities, so please select a suitable flux and use it.
- Please don't do soldering this product by reflow.
- Please make sure in case of hand soldering that you use the solder iron with less than 45W power and the solder iron point (edge) temperature is less than 320°C within 3 seconds, and also don't add any force to lead frame directly.
- Please make sure also you check the mountability prior to the process since the solder portion between the case and the lead frame may be detached due to the heat when soldering.

REFERENCE

7) Use condition

Please use this device away from the dew drop. Be aware that the dew drop rusts shield case and others, may affect the electric characteristics.

8) Output circuit

In case output of V_{out} (Voltage of V_{oh} in the below chart) decreases due to influence from the external circuit, please adjust the circuit constants so that V_{oh} is kept more than 2.8V.

Ex.) When adding transistors to output circuit, they shall be added as R1, R2 shown on the right chart & their value shall be adjusted so that V_{oh} becomes 2.8V or more.
(R_L =about 100k Ω)

9) Outlook of device

The lead flame may be deformed since the device is packed in vinyl bag.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
