

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

IPR2020-01031 and -01032
Patent 10/015,254

Patent Owner SYNKLOUD LLC's
Demonstrative Exhibits

Institution Decision

- Proposed Grounds Instituted
 - Claims 1-5, 8, and 16-18 are alleged to have been obvious over McCown and Dutta
 - Claims 6, 7, 19, and 20 are alleged to have been obvious over McCown, Dutta, and Coates
 - Claims 9-13 and 15 are alleged to have been obvious over McCown and Dutta; and
 - Claims 9-15 are alleged to have been obvious over McCown, Dutta, and Coates

The '254 Patent

- Independent Claim 1 requires
 - A wireless device accessing a remote storage space, the wireless device comprising:
 - at least one cache storage for caching data received from the Internet, and
 - one computer-readable storage device comprising program instructions which, when executed by the wireless device, configure the wireless device accessing the remote space, wherein the program instructions comprise:
 - program instructions for the wireless device establishing a communication link for accessing the remote storage space served by a first server;
 - program instructions for the wireless device displaying the remote storage space upon receiving information of the remote storage space from the first server; and
 - program instructions for the wireless device coupling with the first server to carry out a requested operation for accessing the remote storage space in response to a user, the remote storage space displayed on the wireless device, performing the operation,
 - wherein the operation being carried out for accessing the remote storage space comprises from the wireless device storing data therein or retrieving data therefrom, the storing comprising to download a file from a second server across a network into the remote space through utilizing information for the file cached in the cache storage in the wireless device.

The '254 Patent

- Independent Claim 9 requires
 - A server for delivering storage service, comprising:
 - a plurality of storage spaces residing among a plurality of storage devices; and
 - a computer-readable storage device comprising program instructions that, when executed on the server, configure the server to control delivering the storage service; wherein the program instructions comprise:
 - program instructions for the server establishing a communication link for a first wireless device remotely accessing a first one of the storage spaces;
 - program instructions for the server sending information of the first one of the storage spaces to the first wireless device for causing display of the information on the first wireless device; and
 - program instructions for the server updating the first one of the storage spaces according to a requested operation received from the first wireless device upon a user thereof, through the first wireless device displaying information of the first one of the storage spaces performing the operation; and
 - wherein said operation for remotely accessing the first one of the storage spaces comprises storing data from the first wireless device storing data therein or retrieving data therefrom, wherein the storing data further comprises program instructions for the server downloading a file from a remote server across a network into the first one of the storage spaces through utilizing the first wireless device information for the file cached in a cache storage in the first wireless device

The '254 Patent

- Dependent Claim 2 requires
 - The wireless device of claim 1, wherein said downloading a file from a second server comprises
 - program instructions for the wireless device obtaining the information for the file from the second server and
 - transmitting the information for the file cached in the wireless device to the first server to cause the first server, in accordance with the information for the file, to download the file from the second server into remote storage space.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
