1. What's a data allowance, and why do I need it for my smartphone?

A data allowance is the amount of data included with your selected plan. You use data on your device when not connected to [Wi-Fi \(/support/glossary/#Wi-Fi\)](/support/glossary/#Wi-Fi) and you access the internet, check your email, play games, use social media (e.g., Facebook®, Twitter®, etc.) and more.

Background tasks, such as syncing or location services, may also use data. With The Verizon Plan, the amount of data you use each time you access the internet will be deducted from your data allowance. The Verizon Plan comes with a data allowance that you can share with up to 10 devices on your account.
