IX.	Summary of Grounds.....	73
X.	Ground 1: Claims 1-7 would have been obvious over MacNeil	73
A.	Overview of MacNeil.....	75
B.	Independent claim 1	79
1.	Preamble: A vehicle floor tray thermoformed from a sheet of thermoplastic polymeric material of substantially uniform thickness.....	107
2.	Element 1.a: a central panel substantially conforming to a floor of a vehicle foot well.....	110
3.	Element 1.b: the central panel of the floor tray having at least one longitudinally disposed lateral side and at least one transversely disposed lateral side	113
4.	Element 1.c: a first panel integrally formed with the central panel of the floor tray, upwardly extending from the transversely disposed lateral side of the central panel of the floor tray, and closely conforming to a first foot well wall	117
5.	Element 1.d: the first panel of the floor tray joined to the central panel of the floor tray by a curved transition.....	121
6.	Element 1.e: a second panel integrally formed with the central panel of the floor tray and the first panel, upwardly extending from the longitudinally disposed lateral side of the central panel of the floor tray, and closely conforming to a second foot well wall	124

Inter Partes Review of USPN 8,382,186
Declaration of Paul E. Koch, Ph.D.

7.	Element 1.f: the second panel of the floor tray joined to the central panel of the floor tray and to the first panel of the floor tray by curved transitions	129
8.	Element 1.g: a reservoir disposed in the central panel of the floor tray	133
9.	Element 1.h: a plurality of upstanding, hollow, elongate baffles disposed in the reservoir	135
10.	Element 1.i: each of the baffles having at least two ends remote from each other	137
11.	Element 1.j: the central panel, the first panel, the second panel, the reservoir and the baffles each having a thickness from a point on the upper surface to a closest point on the bottom surface thereof, said thicknesses, as a result of the tray being thermoformed from the sheet of thermoplastic polymeric material of substantially uniform thickness, being substantially uniform throughout the tray....	140
12.	Element 1.k: the baffles each having a width, in any horizontal direction, of more than two times its thickness	144
13.	Element 1.l: the baffles adapted to elevate the shoe or foot of the occupant above fluid collected in the reservoir, and further adapted to impede lateral movement, induced by a change in vehicle speed or direction, of fluid collected in the reservoir.....	145
14.	Element 1.m: any portion of the reservoir connected to a remote portion of the reservoir by a path formed around ends of the baffles	146
15.	A POSA would have been motivated to achieve the claimed uniform thickness.	148
16.	A POSA would have had a reasonable expectation of success.....	150
C.	Dependent claim 2.....	152
D.	Dependent claim 3.....	157
