

CERTIFICATION OF TRANSLATION

This is to certify under the penalty of perjury that I, “Samuel” Shen Chong, personally translated from Chinese into English the document listed as:

TW363545

I am a co-founder of the Chinese translation company Abacus Chinese Translation Services, which provides Chinese, Japanese, and Spanish translation and interpretation and voice over services in Los Angeles, New York, Chicago, and other major cities in the United States and around the world.

I am a certified Court Interpreter Mandarin and English in the State of California and am a Registered Interpreter for the Mandarin language for the New York State Unified Court System. I am also a Mandarin Certified Court Interpreter for numerous other court systems across the United States and elsewhere. I am a former instructor for the Court Interpreters Program at the University of California, Los Angeles Extension Program.

I specialize in translating legal and financial documents, including patents, as well as interpreting as a certified court interpreter for patent and complex litigation cases involving companies located in the United States, Japan, Taiwan, and mainland China. I have experience translating documents related to plastics and different product parts made of plastics. I have been a translator for 17 years and a patent translator for over 15 years, during which time I have translated approximately 50 patents.

The translation attached here is a true and accurate translation of the original written document to the best of my ability and knowledge.

I declare that all statements made herein of my knowledge are true and that all statements made on information and belief are believed to be true, and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed this 2nd day of June, 2021.

“Samuel” Shen Chong

IV. Chinese Abstract of the Creation (Title of creation: Structure for Vehicle Floor Mat)

The creation provides a structure for vehicle floor mat, which comprises three layers of components including a Teton cloth in the top layer, a plastic plate in the middle layer and a mesh pad in the bottom layer. The three layers of components are laminated and integrally formed by the compression molding technology to form a vehicle floor mat, which is a concave disk body. A plurality of convex blocks are arranged symmetrically on the disk surface of the disk body in a protruding manner, a plurality of guiding grooves arranged crisscross are formed among the convex blocks and are roughly in a tendency of guiding downward to collect dirty water, rain and mud and facilitate cleaning. On the bottom of the disk body, countless anti-slip nodes are formed. The foregoing vehicle floor mat is slip resistant, can collect dirt and sand to avoid contaminating the carpet in the vehicle and can be easily cleaned.

English Abstract of the Creation (Title of creation:)

The size of the paper conforms to A4 specification (210×297 mm) stipulated in Chinese national standards (CNS)

V. Description of the Creation (1)

The present creation relates to a structure for vehicle floor mat, particularly to a floor mat with such structure, which not only can be placed on a vehicle carpet for treading without slipping but can also collect dirt and sand on shoe soles to avoid contaminating the carpet in the vehicle and can also guide dirty water to flow to one location by relying on a plurality of symmetric inclined guiding grooves formed in the concave disk to facilitate removal and cleaning.

Generally, high-class vehicle carpets with high quality and a high price are installed in the vehicle. They can improve the overall internal appearance of the vehicle. However, in order to prevent damage of the carpets caused by excessive treading, the vehicle owner normally will install an additional set of floor mats (a set of four mats for the front seats and rear seats) on the vehicle carpets to protect the high-class vehicle carpets under the floor mats. This act is indisputable, but conventional vehicle floor mats are simply placed on the vehicle carpets, so there is no measure or design for strong and firm fixation between the floor mats and the carpets. Therefore, the conventional vehicle floor mats are prone to displacement upon treading, which will necessarily affect driving safety, thereby needing improvement.

Further, conventional vehicle floor mats adopt a planar design, so after a period of time when shoes and boots carry sand, rain, mud, dirty water and other dirt to the floor mats in the vehicle from outside the vehicle, such muddy dirt will contaminate the carpets under the floor mats, which not only may damage the expensive vehicle carpets but will also affect internal appearance of the vehicle. Thus, it is a common defect of conventional vehicle floor mats.

To address the foregoing defect of conventional vehicle floor mats in practice, the creator has designed and developed a vehicle floor mat with an improved structure.

The size of the paper conforms to A4 specification (210×297 mm) stipulated in Chinese national standards (CNS)

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
