Contents

Welcome...	5
Getting the data files.....	6
The POLYWORKS/MODELER SUITE	8
PolyWorks Basics	9
1 – Starting PolyWorks’ modules	9
2 – Interface basics	9
3 – Visualization in IMAlign, IMEdit, and IMView	10
4 – Positioning scans/polygonal models using the mouse	10
Polyworks/Modeler V8 Overview (Schema)	13
Step #1 - IMAlign.....	15
IMAlign basics	16
1 - The Block Project - Getting ready	18
2 - Aligning the scans manually	20
2.1 Load the scans	20
2.2 Hide bad/irrelevant data points from IMAlign processes	21
2.3 Lock one image and ignore the rest	22
2.4 Manually align 3D images one at a time	22
3 - Optimize the global image alignment	26
4 - Analyze the alignment results	27
5 - Remove redundant points (optional)	28
6 - Save the IMAlign group	28
7 - Exit IMAlign	28
Comments	29
Step #2 - IMMerge	31
IMMerge basics	31
1 - The Block Project	35
1.1 Calculating parameter values.....	35

1.2 Creating the polygonal mesh from an IMAlign group	35
Comments	37
Step #3 - IMEdit	39
IMEdit basics.....	39
Triangle & vertex selection.....	41
1 - The Block Project - Getting started	45
2 - Fill holes.....	47
2.1 Clean the holes.....	48
2.2 Fill holes automatically.....	48
2.3 Fill complex holes using a composite Bézier surface	49
3 - Optimize the mesh.....	52
3.1 The Optimize Mesh window	52
3.2 Optimizing the mesh	53
4 - Extract edge and tangent curves.....	57
5 - Reconstruct a corner	59
6 - Reduce the edited mesh	61
6.1 The IMCompress window.....	61
6.2 Reducing a selected group of triangles	61
7 - Generate Cross-Sections.....	63
8 - Subdivide the mesh	65
9 - Export the edited polygonal model	66
10 - Save the IMEdit editing project	66
11 - Get ready to start a new project.....	66
12 - Create fitted NURBS surfaces.....	67
12.1 Create the boundary curves.....	68
12.2 Create curves from pairs of user-picked points	70
12.3 Create additional curves by picking on the model.....	71
12.4 Create the curve network from a set of curves	72
12.5 Create NURBS surfaces fitted on a curve network	73
12.6 Evaluate the resulting NURBS surfaces	74
13 - Export the fitted NURBS surfaces	74
14 - Save the IMEdit editing project	74
15 - Exit IMEdit	74
Comments	75
Glossary	75

Welcome...

To this PolyWorks/Modeler V8.0 Beginner's Guide. It will provide you with a hands-on experience that:

- ✓ Is goal oriented - we give you the scans and polygonal models and you do the work.
- ✓ Uses a step-by-step approach.
- ✓ Has fast forward possibilities - intermediate files are supplied at all major points.
- ✓ Adds expert comments to round up your learning experience.
- ✓ Provides **video segments** that show you the execution of the steps that you will do manually. These video segments are available through the PDF version of this Beginner's Guide, which can be accessed under the Help item on the main menu of the IMAlign and the IMEdit modules.

Before you start...

You will benefit from:

- ✓ Our product presentation - [page 8](#).
- ✓ An introduction to working with PolyWorks - [page 9](#).
- ✓ A visual PolyWorks/Modeler process overview - [page 13](#).

At a glance...

The exercises included in this Beginner's Guide present the following tools:

- ✓ **IMAlign** overview - pages 15 - 30.
- ✓ **IMMerge** overview - pages 31-38.
- ✓ **IMEdit** overview - pages 39-76.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
