A phone including a CPU controlling a plurality of applications, a working storage that holds data and programs used in said applications and storage means acting as a clipboard when copying and pasting data from one application to another. Via the keyboard of the phone data contained in one application may be selected for copying to a clipboard. The CPU identifies predetermined types of subitems in the contents of the data copied to the clipboard. When pasting, said types of subitems may be displayed for individual pasting from the clipboard into the position in said another application appointed by the pasting command.
