No plans right now for that week, but I can certainly join by phone.

-Steve

Steve -

By any chance will you be in SF on Friday 7/23? I am tentatively at the OpenTV SF offices that day.

Milton,

I am based in Denver, but I frequently visit the SF office.

If you can arrange to come through Denver during your upcoming travels, that would be great. Otherwise, let's plan on a phone call within the next few weeks.

-Steve

Hi Steve -

I am following up on Tim's message from this morning. I would appreciate an opportunity to meet with you to discuss what we are doing at BBitV and the possible deployment of our applications on OpenTV technologies. Are you based in Colorado - I noticed the 303 area code? I am based in San Francisco but traveling a lot over the next three weeks. I will be in Honolulu for the next three days, then at CTAM in Boston next week, and then Honolulu again for 3 days the following week. I can find times to meet in between these trips. If meeting in person will be delayed too long, we can start with a telephone call as soon as possible.

Additionally, I have been engaged in conversations with Tracy Geist of the OpenTV SF office since the National Show. We met in New Orleans to

BBitV EX2100
DISH v. BBitV

discuss our products and have been setting up a follow-up meeting at the SF office to continue the discussion. Would the best thing be to set up a meeting between us that also includes Tracy? I will be talking to her tomorrow and can bring her up-to-date.

Thanks for your kind attention and I look forward to speaking with you,
mdp

Steve -

I, of course, remember you.

Please accept this as an introduction to Milton Diaz. Milton is our CTO. I would appreciate it if you could find some time to spend with Milton discussing the possibility of deploying our services on ProSynch.

Milton -

Steve's contact info:

sreynolds@opentv.com
303-302-1501 - office
303-598-1382 - mobile

Please give Steve a call.

Steve, thanks for your help.

Tim

Tim - You met Steve in Hawaii. He's the logical contact for your tech. guy in discussing the possibilities of BBitV doing something on the ProSynch(Wink) platform we've provided to Charter or Rogers.

I don't have his # handy, but BJ can get it handy if you need to talk to him.

I think this is worth pursuing.

Jim
