Subject: navic servlet issues

Hi Nicole,

Please find attached for your review a list of questions and issues concerning Navic servlet development. We have a pretty good grasp of it and we've done a bit of work planning out the database and servlet design, but we to finalize some of the issues that came up during our previous discussions, e.g. Category - Subcategory - Products screens, as identified in the attachment. If we could finalize the items identified in the attachment by the end of this week, then we would like to put together enough servlet materials - screen layouts, methods, etc. - to ask for a review by Navic by mid or end of next week.

Thank you and I look forward to hearing from you!

Best Regards,
Len
