Hi Milton --

The text covers what we mapped out in our session. To get down to details though, it would really help to have charts and drawings to convey the substance of what is going on. Do you have or can you send at least the following:

1. A clean version of the "system architecture" diagram you sketched on our whiteboard?
2. Diagram of the functional components for the Automated Screening System
3. Logic diagram for the steps of templating input, uploading the filled-in template data, converting to video data, time indexing, and synchronizing the consumer-generated content into a video feed output from the VOD system
4. Logic diagram for the Automated Reporting Systems (what data is collected, combined with what subscriber data from the MSO, and used to generate what metrics or report outputs)
