Field of the Invention

The invention relates generally to a communications system and method and, more particularly, to a system and method for providing programming content on demand, through a communications network, such as a cable system.

Background of the Invention

Broadcast of entertainment programming content, such as TV programs, over broadband communications networks, such as cable networks, is well known. As a matter of fact, the amount of programming content delivered over such networks is ever increasing. At the same time, the number and types of cable services, such as Video On Demand ("VOD"), movie-On Demand ("MOD"), subscription VOD ("SVOD"), free on demand ("FOD") and pay per view ("PPV"), etc., introduced to enhance a user's program enjoyment, are ever growing. The array of such features has become diverse in nature, and in some instances complex.

User's of on demand services typically navigate through a series of selection menus displayed on a television screen by a set-top terminal to locate and request a desired program. Each selection menu has different selection links. The selection links may be provided to the set-top terminal by a cable system offering the on demand services, via a broadcast file system server carousel for example. The carousel may continuously and serially provide files containing selection links for all the available services provided by the cable system. The set-top terminal may retrieve the appropriate files from the carousel after a service is selected by a user. Typically, the selection links are displayed on a blank or colored screen. There is limited, if any, graphics provided, since the carousel is generally too slow.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
