100 communication buffer

See DATA COMMUNICATIONS, TELECOMMUNICATIONS.

communication buffer. In communications, a terminal that has a buffer. *See* BUFFER.

communication control unit. (CCU) In data communications, a device employed to control the transmission of data over telecommunication lines in a network. *See* COMMUNICATION SCANNER.

communication link. The physical means of connecting one location to another for the purpose of transmitting and receiving information.

communication processor. *See* FRONT-END PROCESSOR.

Communications Act, 1934. An Act of Congress that established the Federal Communications Commission. *See* FEDERAL COMMUNICATIONS COMMISSION.

Communication Satellite Act, 1962. An Act of Congress that established COMSAT. *See* COMSAT.

communication scanner. In data communications, a device connected between communication lines and a communication control unit. It is employed to monitor the lines and data links for service requests. *See* COMMUNICATION CONTROL UNIT.

communications computer. In data communications, a computer that manages the control of lines and the routing of data in a network. *See* ROUTING.

communication server. *See* SERVER. *Synonymous with* GATEWAY.

communications interface adaptor. In computing, an intelligent device on a bus-organized computer system that provides interface functions between the bus and a

acknowledgements) between a group of modems and a computer or communications network processor. *See* COMMUNICATIONS NETWORK PROCESSOR, MODEM.

communications network processor. (CNP) In data communications, an intelligent unit that performs interface functions (e.g. buffering, code conversion, queue management) between a computer and one or more communications link controllers. *See* COMMUNICATIONS LINK CONTROLLER.

communications satellite system. In communications, a system of earth-orbiting communications satellites and associated ground stations for the purpose of transmitting telephone, television and data signals. *See* DISH ANTENNA, EUTELSAT, GEOSTATIONARY SATELLITE, GROUND STATION, INTELSAT, INTERSPUTNIK, TELEVISION RECEIVE-ONLY.

communications security. In data security, the protection that ensures the authenticity of telecommunications and that results from the application of measures taken to deny unauthorized persons information of value which might be derived from the acquisition of telecommunications. (FIPS). *See* COMPUTER SECURITY, DATA SECURITY.

communication theory. In mathematics, the topic dealing with the transmission of messages in the presence of noise. *See* INFORMATION THEORY, NOISE, SHANNON'S LAW.

community antenna relay station. In television, a specific microwave frequency band (12.75–12.95 MHz), provided by the Federal Communications Commission for transmission of signals to cable television head ends. *Compare* MASTER ANTENNA TELEVISION SYSTEM. *See* CABLE TELEVISION RELAY PICKUP STATION, HEAD END.

community antenna television. (CATV) In cable television, a subscriber system in which a single master antenna provides tele-
