So when we talk in the context of vehicle to improve energy efficiency for the vehicles that they run with IC engines, so we are talking about saving fuel, and saving fuel is directly linked to fuel economy.

And then has that been an industry goal for a long time?

When it comes to the industry, Α there are different objectives that they will pursue. For example, sometimes the emission regulations become an important factor, so then it will become many times the compromise.

So for some cases, that industry might try to suffice fuel economy in order to make sure that it is meeting the emission regulations.

But on a very high level and the general picture, the industry will always try to improve fuel economy while meeting the constraints, the legislative constraints that is imposed on the vehicles.

Dr. M. Shahbakhti

2 When did you first become aware of 3 the Paice patents?

4 Basically when the company door 5 [ph] who hired me for this case sent me 6 these patents.

In paragraph 10 of your 0 declaration, you refer to performing controls-related research sponsored by various automotive companies such as Ford Motor Company, Toyota Motor Corporation, General Motors Corporation, Hitachi, and Denso.

Do you see that?

Yes, I see that. Α

Have any of those companies ever asked you to look at Paice's patents?

Α

19 Are you aware of any of those 20 companies ever challenging Paice's patents?

When I was reading basically the documents for this, I noticed the name of Ford was there, too. But before this IPR, I didn't know about this patent. And I also didn't know the involvement of any other

Dr. M. Shahbakhti

companies in that patent.

Do you recall whether you've reviewed any of the IPRs filed on Paice's patents by any of those companies?

I even didn't know the company Paice before the IPR. I did not know even the company, there is a company called Paice exists.

I guess since you started work on 0 these various IPRs, have you reviewed any IPRs filed by any of those companies?

Α No. Currently, the only IPRs that I'm working on are the ones with Paice. And then I had -- one IPR got finished in 2020. That was not for these companies, but then when that one finished, I started with this IPR. And this is the only IPRs I'm working on now.

I understand.

No. none

I'm just wondering if you've, during your review, considered the materials that were submitted by any of those other companies for other IPRs?

Can you tell me what your understanding is of what the obviousness inquiry requires for combining prior art references?

MR. LIVEDALEN: Objection to the extent it calls for a legal conclusion.

Dr. Shahbakhti, I'll just try again, because it's taking, I guess, a few minutes while you've considered the question. Maybe I should just start with the question of -- okay, I'll let you answer. Go ahead.

If you look at my declaration paragraphs 24 to 28, those explain what I have considered for the obviousness.

Looking at the paragraph 27, it includes a good summary for the factors that I have considered to decide if the topic is obvious or not. One of them is the scope and the content of the prior art; No. 2, the differences between the claims and the prior art; 3, the level of orders built in the pertaining art; and then 4, any objective indicia of the nonobviousness, such as

# DOCKET A L A R M

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
