

FDA Professional Drug Information

The Professional Drug Information database is a repository of drug information sourced directly from the FDA. It includes detailed notes on the clinical pharmacology of a wide variety of drugs.

Search Professional Drug Information

Examples: amoxicillin, ibuprofen, etc.

FDA Documents - More Information

FDA product labels provide Professional Information about drugs. This professional information presents product monographs approved by the US Food and Drug Administration (FDA) and compiled by drug manufacturers. Drugs.com reformats the style of these monographs, but the content is a duplicate of FDA-approved labeling.
