## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this Amendment may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to International Standard ISO 9626:1991 was prepared by Technical Committee ISO/TC 84, *Medical devices for injections*, Subcommittee SC 1, *Syringes, needles and intravascular catheters for single use*.

## Introduction

The purposes of this amendment are to:

- a) add specifications for normal- and thin-walled tubing of metric sizes 0,2 mm, 0,23 mm and 0,25 mm to reflect the introduction of thinner tubing to allow greater comfort when injecting, particularly for infants and in paediatric use;
- b) add minimum inside diameters for thin-walled tubing of metric sizes 0,3 mm to 0,36 mm, as these data are now available;
- c) revise the maximum outside diameter of 0,6 mm metric size tubing to reflect current manufacturing practice;
- d) delete the maximum inside diameter of all types of tubing, as this value is not needed to discriminate between normal-, thin- and extra-thin-walled tubing;
- e) revise the means of specifying the steels to be used, as a result of the withdrawal of ISO 683-13.

For clarity in this amendment, the revised values in the new Tables 2, 3 and 4 are given in **boldface type**.

# Stainless steel needle tubing for the manufacture of medical devices —

## AMENDMENT 1

### Page 1, Scope

Replace the first paragraph by the following:

“This International Standard specifies the dimensions and mechanical properties of normal-walled and thin-walled stainless steel tubing of designated metric sizes 3,4 mm to 0,2 mm and of extra-thin-walled tubing of designated metric sizes 2,1 mm to 0,6 mm.”

### Page 1, Normative references

Delete the reference to ISO 683-13. Add the following normative references:

“ISO/TR 15510:1997, *Stainless steels — Chemical composition.*”

EN 10088-1:1995, *Stainless steels — Part 1: List of stainless steels.*”

### Page 1, clause 3

Replace existing clause 3 with the following:

### “3 Materials

Tubing shall be made of austenitic stainless steel of one of the designated types given in Table 1 or any of the corresponding designations given in ISO/TR 15510, Table 2.”

Add the following new Table 1:

**Table 1 — Types of stainless steel for needle tubing**

Designation in ISO/TR 15510:1997 and EN 10088-1:1995	Line number in Tables 1 and 2 of ISO/TR 15510:1997	Corresponding type in ISO 9626:1991 and ISO 683-13:1986 (for information only)
X2CrNi 18-9	1	10
X5CrNi 18-9	6	11
X6CrNiNb 18-10	17	16
X5CrNiMo 17-12-2	26	20
X6CrNiMoTi 17-12-2	28	21
X6CrNiMoNb 17-12-2	29	23

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
