From tip to tip, the Telescope™ Guide Extension Catheter is 38% stiffer than the GuideLiner® V3 Catheter*

- Tip = 39% stiffer
- Coiled extension = 23% stiffer
- Pushrod = 39% stiffer

38% stiffer longitudinally (Telescope™ GEC)

*All values and relative product comparisons are based on bench test data averages (n≥5) of competitive models and are analyzed with a minimum of 95% confidence as a percentage of the means. Bench test results may not necessarily be indicative of clinical performance. Testing completed by Teleflex. Data on file.

The GuideLiner® V3 Catheter's coil-reinforced design exhibits superior shape retention in tortuosity or acute bends*

6fr Guidelin® V3 Catheter

6fr Telescope™ GEC

*All values and relative product comparisons are based on bench test data averages (n≥5) of competitive models and are analyzed with a minimum of 95% confidence as a percentage of the means. Bench test results may not necessarily be indicative of clinical performance. Testing completed by Teleflex. Data on file.

The Telescope™ Guide Extension Catheter's coil-reinforced design is more kinkable than the GuideLiner® V3 Catheter's coil-reinforced design*

We previously showed this in a table in the Guidezilla brochure, but I am open to ideas.

	Guide extension kink diameter
6 Fr. Guidelin® V3 Catheter	0 mm (did not kink during tests)
6 Fr. Telescope™ Guide Extension Catheter	10 mm

*All values and relative product comparisons are based on bench test data averages (n≥5) of competitive models and are analyzed with a minimum of 95% confidence as a percentage of the means. Bench test results may not necessarily be indicative of clinical performance. Testing completed by Teleflex. Data on file.
