## End-to-End Innovation Supports the Radial Reach

### True Support for Small Vessel Delivery

The 5F Guideline<sup>®</sup> V3 Catheter was designed specifically to support 5F guide interventions and small vessel delivery. Its small crossing profile allows it to fit through any 5F guide catheter, which means fewer guide catheter restrictions and greater confidence during interventions.

### Unique V3 Half-Pipe Technology

Increases back-up support while allowing deep-seating for coaxial alignment, facilitation of distal device delivery and selective delivery of contrast

## 0.046" I.D. to Facilitate Select Device Delivery\*
