

Microsoft Office 365 is Being Adopted and Used at an Enormous Rate

Microsoft Office 365 is Being Adopted and Used at an Enormous Rate

04/08/2019

Under the leadership of Satya Nadella, Microsoft has regained the ground it lost to other tech giants in previous years and is set to capture even more attention and market share in the years to come.

One of the keys to Microsoft's success has been the steadily rising adoption of its Office 365 subscription service - including the widely used Office 365.

(All statistics courtesy of Gartner, unless otherwise sited.)

Here are 2 recent statistics that give insight into where Office 365 is going:

1. 1 in 5 corporate employees now use an Office 365 cloud service.
2. Office 365 is the most widely used cloud service by user count.

Adoption of Office 365 by industry

In addition to the special Office 365 licenses extended to education and government organizations, there are many industries finding Office 365 to be a viable cloud solution available.

At the moment, the financial services industry has the highest rate of usage. This makes sense, since traditionally, financial firms have been quick to adopt new technology and are also heavy users of Office apps like Excel. Microsoft's focus on making its cloud services meet FISC and GDPR data protection requirements also make Office 365 a natural choice for an industry that regularly deals in the transaction of sensitive data.

Second only to financial services, the [manufacturing industry has migrated to using Office 365](#) and especially the OneDrive app for cloud storage at a rate of over 26% of its users.

Initially slower to adopt, the healthcare industry has seen an uptick of recent usage, partly due to Microsoft creating an in-house [team](#) specifically tasked with serving their needs. Microsoft held a [Healthcare & Life Sciences Virtual Conference](#) last January and have ensured that [Teams](#) has the HIPAA compliance and features healthcare groups need to make that platform their default communication tool.

In the legal field, [The American Bar Association](#) recently published a report on the benefits of Office 365 for legal firms - which highlighted specific use cases for groups, Teams, and automations using Microsoft Flow.

Has Microsoft Already Won the Cloud War?

According to Bitglass, usage of Office 365 globally in 2016 was around 34%. That number is expected to reach 50% by 2020.

This means Office 365 users now make up over half of the 81% of total organizations who have made the shift to cloud services.

Compare that with the relatively stagnant growth of Google's G Suite since since 2016.

A few more stats compiled from Microsoft and DMR

1. There are now over 155 million Office 365 business users (2018).
2. Outlook mobile app users reached 90 million in 2017.
3. Microsoft office has been downloaded on Android over 1 billion times (2018).
4. Office 365 made its Mac App Store debut in January of this year (2019).
5. There are now 500,000 businesses using Microsoft Teams, including 91% of the Fortune 100 (2019).

What does this mean for SMB's?

On one hand, the future looks bright. With Windows 10 and Office 365 subscriptions that have been shown to bring a positive [ROI within 13 months](#) of investment, there are plenty of licenses and options to suit any business.

The workforce will continue to trend towards a "work from anywhere on any device" model, and small to mid-sized businesses who don't invest in a proven solution face the risk of not being able to compete in the areas of staffing, productivity, and future.

Do you need to speak with a [cloud services expert](#) about Office 365? We're happy to answer any questions you might have.

It cannot be denied that more and more companies are adopting Office 365 and reaping the benefits. I had recently contacted Changing Social Media Adoption and Change plan that's suitable for my organization's success. It will take some time before the full potentials of Office 365 are realized but the adoption is completely worth it. Moreover, these statistics are solid evidence of the fact that an increasing number of industries are switching to Office 365 and it is for

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
