

HECHT SECOND EDITION OPTICS

# OPTICS

SECOND EDITION

**EUGENE HECHT**

Adelphi University

With Contributions by Alfred Zajac

ADDISON-WESLEY PUBLISHING COMPANY

Reading, Massachusetts • Menlo Park, California • Don Mills, Ontario

Wokingham, England • Amsterdam • Sydney • Singapore

Tokyo • Madrid • Bogotá • Santiago • San Juan

*Sponsoring editor:* Bruce Spatz  
*Production supervisors:* Margaret Pinette and Lorraine Ferrier  
*Text designer:* Joyce Weston  
*Illustrators:* Oxford Illustrators  
*Art consultant:* Loretta Bailey  
*Manufacturing supervisor:* Ann DeLacey

**Library of Congress Cataloging-in-Publication Data**

Hecht, Eugene.  
Optics.

Bibliography: p.  
Includes indexes.

1. Optics. I. Zajac, Alfred. II. Title.

QC355.2.H42 1987 535 86-14067

ISBN 0-201-11609-X

# Contents

|  |           |   |            |
|--|-----------|---|------------|
| <b>1 A Brief History</b>                                       | <b>1</b>  | 4.2 The Laws of Reflection and Refraction . . . .                     | 79         |
| 1.1 Prolegomenon . . . . .                                     | 1         | 4.3 The Electromagnetic Approach . . . . .                            | 92         |
| 1.2 In the Beginning . . . . .                                 | 1         | 4.4 Familiar Aspects of the Interaction of Light and Matter . . . . . | 114        |
| 1.3 From the Seventeenth Century . . . . .                     | 2         | 4.5 The Stokes Treatment of Reflection and Refraction . . . . .       | 118        |
| 1.4 The Nineteenth Century . . . . .                           | 5         | 4.6 Photons and the Laws of Reflection and Refraction . . . . .       | 120        |
| 1.5 Twentieth-Century Optics . . . . .                         | 8         | Problems . . . . .  | 121        |
| <b>2 The Mathematics of Wave Motion</b>                        | <b>12</b> | <b>5 Geometrical Optics—Paraxial Theory</b>                           | <b>128</b> |
| 2.1 One-Dimensional Waves . . . . .                            | 12        | 5.1 Introductory Remarks . . . . .                                    | 128        |
| 2.2 Harmonic Waves . . . . .                                   | 15        | 5.2 Lenses . . . . .  | 129        |
| 2.3 Phase and Phase Velocity . . . . .                         | 17        | 5.3 Stops . . . . .   | 149        |
| 2.4 The Complex Representation . . . . .                       | 19        | 5.4 Mirrors . . . . .   | 153        |
| 2.5 Plane Waves . . . . .                                      | 21        | 5.5 Prisms . . . . .  | 163        |
| 2.6 The Three-Dimensional Differential Wave Equation . . . . . | 23        | 5.6 Fiberoptics . . . . .   | 170        |
| 2.7 Spherical Waves . . . . .                                  | 24        | 5.7 Optical Systems . . . . .   | 176        |
| 2.8 Cylindrical Waves . . . . .                                | 27        | Problems . . . . .  | 202        |
| 2.9 Scalar and Vector Waves . . . . .                          | 28        | <b>6 More on Geometrical Optics</b>                                   | <b>211</b> |
| Problems . . . . .   | 30        | 6.1 Thick Lenses and Lens Systems . . . . .                           | 211        |
| <b>3 Electromagnetic Theory, Photons, and Light</b>            | <b>33</b> | 6.2 Analytical Ray Tracing . . . . .                                  | 215        |
| 3.1 Basic Laws of Electromagnetic Theory . . . .               | 34        | 6.3 Aberrations . . . . .   | 220        |
| 3.2 Electromagnetic Waves . . . . .                            | 39        | Problems . . . . .  | 240        |
| 3.3 Energy and Momentum . . . . .                              | 43        | <b>7 The Superposition of Waves</b>                                   | <b>242</b> |
| 3.4 Radiation . . . . .  | 47        | <i>The Addition of Waves of the Same Frequency</i>                    | 243        |
| 3.5 Light and Matter . . . . .                                 | 56        | 7.1 The Algebraic Method . . . . .                                    | 243        |
| 3.6 The Electromagnetic-Photon Spectrum . . . .                | 68        | 7.2 The Complex Method . . . . .                                      | 246        |
| Problems . . . . .   | 75        |   |            |
| <b>4 The Propagation of Light</b>                              | <b>79</b> |   |            |
| 4.1 Introduction . . . . .                                     | 79        |   |            |

x Contents

|   |            |   |            |
|---|------------|---|------------|
| 7.3 Phasor Addition . . . . .                             | 247        | <b>11 Fourier Optics</b>  | <b>472</b> |
| 7.4 Standing Waves . . . . .                              | 248        | 11.1 Introduction . . . . .   | 472        |
| <i>The Addition of Waves of Different Frequency</i>       | 250        | 11.2 Fourier Transforms . . . . .   | 472        |
| 7.5 Beats . . . . .                                       | 250        | 11.3 Optical Applications . . . . .                                       | 483        |
| 7.6 Group Velocity . . . . .                              | 252        | Problems . . . . .  | 512        |
| 7.7 Anharmonic Periodic Waves—Fourier Analysis            | 254        | <b>12 Basics of Coherence Theory</b>                                      | <b>516</b> |
| 7.8 Nonperiodic Waves—Fourier Integrals . . . . .         | 259        | 12.1 Introduction . . . . .   | 516        |
| 7.9 Pulses and Wave Packets . . . . .                     | 261        | 12.2 Visibility . . . . .   | 519        |
| 7.10 Optical Bandwidths . . . . .                         | 263        | 12.3 The Mutual Coherence Theory and the<br>Degree of Coherence . . . . . | 523        |
| Problems . . . . .  | 266        | 12.4 Coherence and Stellar Interferometry . . . . .                       | 530        |
| <b>8 Polarization</b>                                     | <b>270</b> | Problems . . . . .  | 535        |
| 8.1 The Nature of Polarized Light . . . . .               | 270        | <b>13 Some Aspects of the Quantum Nature of<br/>Light</b>                 | <b>538</b> |
| 8.2 Polarizers . . . . .                                  | 277        | 13.1 Quantum Fields . . . . .   | 538        |
| 8.3 Dichroism . . . . .                                   | 279        | 13.2 Blackbody Radiation—Planck's Quantum<br>Hypothesis . . . . .         | 539        |
| 8.4 Birefringence . . . . .                               | 282        | 13.3 The Photoelectric Effect—Einstein's Photon<br>Concept . . . . .      | 541        |
| 8.5 Scattering and Polarization . . . . .                 | 292        | 13.4 Particles and Waves . . . . .  | 544        |
| 8.6 Polarization by Reflection . . . . .                  | 296        | 13.5 Probability and Wave Optics . . . . .                                | 548        |
| 8.7 Retarders . . . . .                                   | 300        | 13.6 Fermat, Feynman, and Photons . . . . .                               | 550        |
| 8.8 Circular Polarizers . . . . .                         | 305        | 13.7 Absorption, Emission, and Scattering . . . . .                       | 552        |
| 8.9 Polarization of Polychromatic Light . . . . .         | 306        | Problems . . . . .  | 556        |
| 8.10 Optical Activity . . . . .                           | 309        | <b>14 Sundry Topics from Contemporary Optics</b>                          | <b>559</b> |
| 8.11 Induced Optical Effects—Optical Modulators           | 314        | 14.1 Imagery—The Spatial Distribution of Optical<br>Information . . . . . | 559        |
| 8.12 A Mathematical Description of Polarization . . . . . | 321        | 14.2 Lasers and Laserlight . . . . .                                      | 577        |
| Problems . . . . .  | 326        | 14.3 Holography . . . . .   | 593        |
| <b>9 Interference</b>                                     | <b>333</b> | 14.4 Nonlinear Optics . . . . .   | 610        |
| 9.1 General Considerations . . . . .                      | 334        | Problems . . . . .  | 616        |
| 9.2 Conditions for Interference . . . . .                 | 337        | <b>Appendix 1</b>   | <b>620</b> |
| 9.3 Wavefront-Splitting Interferometers . . . . .         | 339        | <b>Appendix 2</b>   | <b>623</b> |
| 9.4 Amplitude-Splitting Interferometers . . . . .         | 346        | <b>Table 1</b>  | <b>624</b> |
| 9.5 Types and Localization of Interference Fringes        | 361        | <b>Solutions to Selected Problems</b>                                     | <b>629</b> |
| 9.6 Multiple-Beam Interference . . . . .                  | 363        | <b>Bibliography</b>   | <b>661</b> |
| 9.7 Applications of Single and Multilayer Films . . . . . | 373        | <b>Index of Tables</b>  | <b>665</b> |
| 9.8 Applications of Interferometry . . . . .              | 378        | <b>Index</b>  | <b>667</b> |
| Problems . . . . .  | 388        |   |            |
| <b>10 Diffraction</b>                                     | <b>392</b> |   |            |
| 10.1 Preliminary Considerations . . . . .                 | 392        |   |            |
| 10.2 Fraunhofer Diffraction . . . . .                     | 401        |   |            |
| 10.3 Fresnel Diffraction . . . . .                        | 434        |   |            |
| 10.4 Kirchhoff's Scalar Diffraction Theory . . . . .      | 459        |   |            |
| 10.5 Boundary Diffraction Waves . . . . .                 | 463        |   |            |
| Problems . . . . .  | 465        |   |            |

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
