THE SOUTHERN OCEAN FISHERIES SURVEY PROGRAMME

In view of the potential importance of the living resources of the Southern Ocean, the United Nations Development Programme (UNDP) Governing Council approved in January 1976 a preparatory phase of a Southern Ocean Fisheries Survey Programme, to be executed by the Food and Agriculture Organization of the United Nations (FAO). The long-term objective of the Programme is to improve the knowledge of the nature, magnitude and distribution of the living resources of the Southern Ocean (South of latitude 45°S), with a view to assisting in their eventual rational utilization. The immediate activities of the preparatory phase (to continue until the end of 1977) include a review of the present information on the distribution and magnitude of the living resources of the Southern Ocean; a review and evaluation of the present state of exploitation and utilization of these resources; and the establishment of a system for regular compilation of statistical and other information about them.

This report is one of a series prepared by FAO under the preparatory phase of the Programme. It gathers together current knowledge on the biochemistry, processing and marketing of Antarctic krill. Other reports in this series assemble current knowledge on the magnitude and distribution of the living resources of the Southern Ocean, and on the technology of krill harvesting.
