(57) **ABSTRACT**

Systems and methods for providing online games, including various means of providing computer-implemented games using standard and non-standard tokens, and that operate in coordination with an online social network. Examples of standard tokens may include tokens associated with each card of a standard 52 card deck, units in a real-time strategy game, and the like. Non-standard tokens may represent digital tokens with specified attributes and associated digital rights management for use by specified users, such as users purchasing rights to a particular non-standard token. Non-standard tokens may also include tokens with different functionality across a number of different computer-implemented games.
