## Summary of Findings - Engineering (1)

- Elegant design concept, implemented with very little complications
- They have focused on reducing the product cost both on the device and the liquid cartridge
- To date they have released 5 different product offerings
- They all use the same basic design
- Four of these are current products
  - One based on a pipe type device
  - Two look like cigars
  - One looks like a cigarette
    - called E-Cigarette, the one to watch!!
- There are two other products look very much like Ruyan but under different packaging
  - Are they commercially available?
- The products are available via internet including ebay
