## AFFIDAVIT OF ELIZABETH ROSENBERG

1. I am a Records Request Processor at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.
2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.
3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.
4. The archived data made viewable and browseable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.
5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]` aka an "extended URL". Thus, the extended URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.
6. Attached hereto as Exhibit A are true and accurate copies of browser printouts of the Internet Archive's records of the archived files for the URLs and the dates

specified in the footer of the printout or an attached coversheet (in the case of records for which a browser does not provide a ready option to print a URL in the footer, e.g., in the case of a PDF file).

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE: 08/10/2020

  
Elizabeth Rosenberg

## How To Use

- ▶ [E-CIG](#)
- ▶ [E-Cigar](#)
- ▶ [E-Smoking Liquid](#)
- ▶ [E-Cartridge](#)
- ▶ [E-Cigar Cap](#)
- ▶ [Battery & Charger](#)
- ▶ [Guarantee](#)
- ▶ [Shop](#)
- ▶ [Wholesale](#)
- ▶ [FAQs](#)
- ▶ [Structure](#)
- ▶ [How To Use](#)
- ▶ [Maintenance](#)
- ▶ [About Us](#)
- ▶ [Contact Us](#)

It is easy to use E-CIG:

- Step 1: Unscrew and detach the indicator light cap
- Step 2: Insert the battery into E-CIG Cigar shell with the negative pole first
- Step 3: Screw back the indicator light cap
- Step 4: Unwrap the cartridge box, take out the cartridge
- Step 5: Screw the cartridge into E-CIG Cigar shell.

You are ready to enjoy E-CIG now. When you inhale E-CIG, the electronic circuit works automatically; the head of E-CIG light turns red, simulating burning cigar and cigar smoking. When you stop to inhale E-CIG, the electronic circuit stops automatically; and the red light as well as the smoke stop also. If the red light of the head becomes darker, it is the time for you to recharge the battery. When you charge the battery, beware the positive and negative poles at the correct directions.

After you have used about 20 to 30 days, if you recognize the smoke become less with the new cartridge and full charged battery, you need to reset E-CIG to the normal working condition. Unscrew, detach and take out the cartridge first, you can use a pin or paper clip; slightly insert into the reset hole and hold for about some seconds for two times, E-CIG is reset for the normal working condition.

Please do not reset frequently. Keep the reset hole away from water.

Cautions:

E-CIG is for the adults who are smoking, not for the young people under 21 years old, not for pregnant women or other people who are not suitable for smoking.

## Smoking Cartridge

The Cartridge is composed of inhaler and nicotine fluid container. There is some of diluted nicotine fluid ready for atomizing in the container, with the different density for the different smokers. The nicotine fluid is purified from tobacco by biological technology, removing the harmful substances in the tobacco and keeping the harmless or useful substances, as well as adding different essence. It not only keeps the cigarette's basic function, but also removes the harmful substances. Since one cartridge contains nicotine less than or equivalent to that of one pack of cigarettes, smokers can consume one cartridge in 1.5-2 days if they consume one pack of cigarettes in one day. The reason is that cigarette self-consumes when igniting, while the cartridge will not self-consume.

According to the different needs of smokers, there are four kinds of smoking cartridges:

<p>High Nicotine Smoking Cartridge Package: 1 cartridges / pack 18 mg nicotine/cartridge</p>	<p><b>\$2.95/cartridge</b> PayPal ADD TO CART</p>	<p>Medium Nicotine Smoking Cartridge Package: 1 cartridges / pack 14 mg nicotine/cartridge</p>	<p><b>\$2.95/cartridge</b> PayPal ADD TO CART</p>
<p>Low Nicotine Smoking Cartridge Package: 1 cartridges / pack 11 mg nicotine/cartridge</p>	<p><b>\$2.95/cartridge</b> PayPal ADD TO CART</p>	<p>Non Nicotine Smoking Cartridge Package: 1 cartridges / pack 0 mg nicotine/cartridge</p>	<p><b>\$2.95/cartridge</b> PayPal ADD TO CART</p>

To quit the tobacco and nicotine smoking, Electronic Cigar can be used with the four basic tastes such as the high, medium, low and zero nicotine thickness cartridges to meet the requirements of different smokers. The following Four Steps procedure is designed specially for smokers who is willing to quit reduce their nicotine reduction unconsciously by decreasing the inhaled nicotine volume:

### Four Steps Procedure:

- Step 1: Starting with high nicotine density cartridge following normal smoking habit;
- Step 2: Then switch to medium nicotine density cartridge following normal smoking habit;
- Step 3: Then alternate between the low nicotine density cartridge and the non-nicotine thickness cartridge;
- Step 4: Finally, quit smoking by using the non-nicotine cartridge, you will quit the nicotine reduction unconsciously and completely.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
