U.S. Patent No. 8,749,251 ("'251 Patent") in light of Krah

Complainant denies that U.S. Patent Application Publication No. 2008/0162996 ("Krah") anticipates any No. 8,749,251 ("'251 Patent") and denies that Krah, alone or in combination with any other reference, renders of the '251 Patent. As to obviousness, Respondents have failed to identify any limitation of any claim that is not did have failed to identify any basis for combining Krah with any other reference or with the alleged knowledge of the art.

There is a list of purported prior art references identified at the top of Respondents' claim chart for Krah. not admit that any reference in that list qualifies as prior art to the '251 Patent. Complainant expressly denies the adequately disclosed any obviousness theory based on a combination of references for which Respondents' claim disclose the specific references to be combined and the purported motivation to combine these specific references.

Claims	Krah
1[pre] An apparatus comprising:	To the extent the preamble is construed as a limitation, Respondents Krah discloses the claimed apparatus.
1[a] a sensing element of a touch screen; and	Respondents have not shown that Krah discloses the claimed "sensi screen."
1[b] one or more computer-readable non- transitory storage media coupled to the sensing element and embodying logic that is operable when executed to: determine an amount of time that has elapsed since the sensing element last detected a change of capacitance indicative of a key touch on the touch screen; and if the amount of time that has elapsed exceeds a predetermined time duration, then initiate a particular	Respondents have not shown that Krah discloses the claimed "one of readable non-transitory storage media coupled to the sensing element logic that is operable when executed to: determine an amount of time since the sensing element last detected a change of capacitance indicated on the touch screen; and if the amount of time that has elapsed exceet time duration, then initiate a particular function of the apparatus." Furthermore, Respondents have not identified the particular portion contend correspond to the claimed "amount of time," the claimed "I touch screen," the claimed "predetermined time duration," or the claimed function of the apparatus."

Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references.

function of the apparatus.

Claims	Krah
	Respondents have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which refer proposed combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
2[a] The apparatus of claim 1, wherein the particular function comprises deactivation of measurement of changes in capacitance by the sensing element.	Neodron and the Staff contend that "deactivation of measurement o capacitance" should be construed as: Plain and ordinary meaning: " measurement of changes in capacitance." Respondents contend that measurement of changes in capacitance" should be construed as "st scheduled measurements of changes in capacitance."
	Respondents have not shown that Krah discloses the apparatus of cl
	Respondents have not shown that Krah discloses the claimed appara particular function comprises deactivation of measurement of chang the sensing element."
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
3[a] The apparatus of claim 1, wherein	Respondents have not shown that Krah discloses the apparatus of cl
the particular function comprises recalibration of measurement of changes in capacitance by the sensing element.	Respondents have not shown that Krah discloses the claimed appara particular function comprises recalibration of measurement of change the sensing element."
	Respondents identify an additional reference allegedly disclosing the which Complainant addresses in its corresponding claim charts for the second se

Claims	Krah	
	Respondents have failed to show that one of ordinary skill in the art combined the identified reference with Krah. Respondents' boilerp regarding alleged motivation to combine fails to identify specific re ordinary skill in the art would have combined the teachings of these	
4[a] The apparatus of claim 1, wherein the logic is further operable to calculate the predetermined time duration based on one of a plurality of power supply voltages or an output voltage of the sensing element.	Respondents have not shown that Krah discloses the apparatus of cl	
	Respondents have not shown that Krah discloses the claimed apparalogic is further operable to calculate the predetermined time duratio plurality of power supply voltages or an output voltage of the sensir	
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one the art would have combined the teachings of these references.	
5[a] The apparatus of claim 1, wherein the logic is further operable to calculate the predetermined time duration based on one of a plurality of delay multipliers determined by a polarity of a voltage pulse.	Respondents have not shown that Krah discloses the apparatus of cl	
	Respondents have not shown that Krah discloses the claimed apparalogic is further operable to calculate the predetermined time duratio plurality of delay multipliers determined by a polarity of a voltage p	
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one	

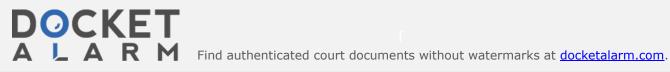

the art would have combined the teachings of these references.

Claims	Krah
6[a] The apparatus of claim 1, wherein the particular function comprises turning off the apparatus.	Respondents have not shown that Krah discloses the apparatus of cl
	Respondents have not shown that Krah discloses the claimed apparary particular function comprises turning off the apparatus."
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
7[a] The apparatus of claim 1, wherein	Respondents have not shown that Krah discloses the apparatus of cl
sensing element comprises a control circuit.	Respondents have not shown that Krah discloses the claimed appara element comprises a control circuit."
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
8[a] The apparatus of claim 7, wherein the sensing element further comprises a pattern of electrodes within the touch screen, the electrodes being coupled to the control circuit.	Respondents have not shown that Krah discloses the apparatus of cl
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those re Respondents have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references

Claims	Krah
	proposed combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
9[a] The apparatus of claim 8, wherein the electrodes comprise indium tin oxide (ITO).	Respondents have not shown that Krah discloses the apparatus of cl Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those re Respondents have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which refer proposed combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
16[pre] A computer- readable non- transitory storage media embodying logic that is operable when executed to:	Respondents have not shown that Krah discloses a "computer- reads storage media embodying logic that is operable when executed to" steps.
16[a] monitor detection by a sensing element of a key touch on a touch screen, the sensing element being of a touch screen;	Respondents have not shown that Krah discloses the claimed step "a sensing element of a key touch on a touch screen, the sensing element screen." See supra element 1[a].
	Respondents identify additional references allegedly disclosing this Complainant addresses in its corresponding claim charts for those references have failed to show that one of ordinary skill in the art combined any of the identified references with Krah. Respondents' regarding alleged motivation to combine fails to specify which references combination and fails to identify specific reasons that one the art would have combined the teachings of these references.
16[b] determine an amount of time that has elapsed since the sensing element last detected a change of capacitance	Respondents have not shown that Krah discloses the claimed step "of time that has elapsed since the sensing element last detected a ch indicative of a key touch on the touch screen."

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
