I own this phone, it turns a lot of heads, and it's an EXCELLENT phone, too, the swiping is more intuitive than one gets the hang of it, this is the best touch screen ever. I had to import mine from Malaysia, and was slapped with an import fee, but hell, for a phone as unique looking and as good as this one, it was worth every penny!

well, it's just a good phone, the swiping works great, and the connection with the network is good (sorry for my english, it's not my best class:P)
