Samsung Galaxy

Samsung Galaxy (Korean: 삼성 갤럭시, stylised as **SAMSUNG Galaxy** since 2015,^[2] previously stylised as **Samsung GALAXY**; abbreviated as **SG**) is a series of computing and mobile computing devices that are designed, manufactured and marketed by Samsung Electronics. The product line includes the Samsung Galaxy S series of high-end smartphones, the Samsung Galaxy Tab series of tablets, the Samsung Galaxy Note series of tablets and phablets with the added functionality of a stylus, the foldable Samsung Galaxy Z series, and smartwatches including the first version of the Samsung Galaxy Gear, with later versions dropping the Galaxy branding, until the release of the Samsung Galaxy Watch in 2018.

Samsung Galaxy devices use the Android operating system produced by Google, with a custom user interface called One UI (with previous versions being known as Samsung Experience and TouchWiz). However, the Galaxy TabPro S is the first Galaxy-branded Windows 10 device that was announced in CES 2016. The Galaxy Watch is the first Galaxy-branded smartwatch since the release of later iterations of the Gear smartwatch from 2014 to 2017.

In 2020 Samsung added the Samsung Galaxy Chromebook 2-in-1 laptop running Chrome OS to the Galaxy branding lineup.^[3] The follow-on Samsung Galaxy Chromebook 2 was released in 2021.^[4]
