DEMONSTRATIVE EXHIBIT – NOT EVIDENCE

'020 Patent's "Switching Device"

Independent Claim

1. A system comprising:

a portable **switching device** coupled to a portable electronic device;

wherein:

the switching device and the electronic device are configured to selectively couple to each other employing magnetic force from a first magnet disposed within the switching device;

the switching device comprises a first case;

the electronic device comprises a second case and an electronic circuit that is responsive to the switching device; the electronic device comprises at least one element selected from the group consisting of beveled edges, ridges, recessed areas, grooves, slots, indented shapes, bumps, raised shapes, and combinations thereof; configured to correspond to complementary surface elements on the switching device;

the portable switching device is configured to activate, deactivate or send into hibernation the portable electronic device; and

when coupled, the second case functions to protect the first case.
