(57) **ABSTRACT**

A headset with removable ear pieces such that a user may interchange between ear gels and mushroom type ear pieces, or other pieces. The earpieces may be removably attached to the headset using a circular snap in some embodiments. An ear gel consisting of two types of elastomer of differing hardness, allowing for a soft elastomer to be in contact with the user's ear, giving greater comfort and better fit, the soft elastomer overmolded onto a firmer elastomer used to snap to the headset.
