(60) Provisional application No. 61/298,974, filed on Jan. 28, 2010.

Tablet computer cases and associated methods and described. In one embodiment, a clamshell case may include a tablet panel with a hollow defined by a recessed back surface and a perimeter edge extending around the recessed back surface. The perimeter edge can have an internal shape and size matching a shape and size of an external peripheral tablet computer to be held in the hollowed out panel. The panel can be hingedly coupled to a keyboard. When a tablet computer is held in the hollow of the tablet panel, the keyboard can be used to perform and/or control actions with respect to the tablet computer.
