[57] **ABSTRACT**

A series of image sensors is spaced along a roadway at particular intervals to provide images of the traffic and an identification signal associating those images with the location of the particular sensor providing the images. A main station receives the images from all cameras and broadcasts an information signal comprising segments of those images and the identifications in a particular sequence in accordance with the predominant direction of travel on the roadway. User units include a receiver which displays the images so that the user may preview the roadway ahead to make route choices. In systems covering multiple roadways, the user may select images of the particular roadway to view. The receiver is also responsive to a local broadcast of the camera's identification signal to thereby determine the geographical location of the user and alert the user when particularly pertinent images are being displayed and when decision points are reached where the user must make a route change choice. In another aspect, speed data is also provided by each camera station along the roadway.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
