Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION
IN LTE-ADVANCED

RELATED APPLICATION

[0001] This application is a continuation of U.S. Patent Application No. 12/896,993, filed October 4, 2010, now U.S. Patent No. 9,497,004, issued November 15, 2016, claiming the benefit of U.S. Provisional Patent Application 61/248,661, filed October 5, 2009, all of which the contents are hereby incorporated by reference as if fully set forth below.

TECHNICAL FIELD

[0002] The present invention relates generally to carrier aggregation in a mobile communication system and, more particularly, to an efficient resource allocation for the physical uplink control channel for carrier aggregation.

BACKGROUND

[0003] Carrier aggregation is one of the new features being discussed for the next generation of Long Term Evolution (LTE) systems, which is being standardized as part of LTE Release 10 (known as LTE-Advanced). LTE Rel 8 currently supports bandwidths up to 20 MHz. In LTE-Advanced, bandwidths up to 100 MHz will be supported. The very high data rates contemplated for LTE-Advanced will require an expansion of the transmission bandwidth. In order to maintain backward compatibility with LTE Rel-8 user terminals, the available spectrum is divided into Rel-8 compatible chunks called component carriers. Carrier aggregation enables the needed bandwidth expansion by allowing user terminals to transmit data over multiple component carriers comprising up to 100 MHz of spectrum. Carrier aggregation also ensures efficient use of a wide carrier for legacy terminals by making it possible for legacy terminals to be scheduled in all parts of the wideband LTE-Advanced carrier.

[0004] The number of aggregated component carriers, as well as the bandwidth of the individual component carrier, may be different for Uplink (UL) and Downlink (DL). A symmetric configuration refers to the case where the number of component carriers in downlink and uplink is the same. An asymmetric configuration refers to the case where the number of component carriers is different. The number of component carriers

configured for a geographic cell area may be different from the number of component carriers seen by a terminal. A user terminal, for example, may support more downlink component carriers than uplink component carriers, even though in the geographic cell area the same number of uplink and downlink component carriers is offered by the network.

[0005] One consideration for carrier aggregation is how to transmit control signaling from the user terminal on the uplink from the user terminal. Uplink control signaling may include acknowledgement (ACK) signaling for hybrid automatic repeat request (HARQ) protocols, channel state and quality information (CSI, CQI) reporting for downlink scheduling, and scheduling requests (SRs) indicating that the user terminal needs uplink resources for uplink data transmissions. One solution is to transmit the uplink control information on multiple uplink component carriers associated with different downlink component carriers. However, this option is likely to result in higher user terminal power consumption and a dependency on specific user terminal capabilities. It may also create implementation issues due to inter-modulation products, and may lead to generally higher complexity for implementation and testing.

SUMMARY

[0006] The invention provides a signaling mechanism for efficient transmission of control information in a communication system using carrier aggregation. The signaling mechanism allows the transmission, on a single uplink component carrier, of control information associated with downlink transmissions on multiple aggregated downlink component carriers. Semi-statically reserved resources for the transmission of control information on the uplink component carrier may be dynamically shared by user terminals that are assigned multiple downlink component carriers for downlink transmissions. Implicit or explicit resource indication can be used in combination with dynamic resource indication.

[0007] One exemplary embodiment of the invention comprises a method implemented by a base station of receiving control information from user terminals. The method comprises scheduling downlink transmissions to said user terminal on one or more downlink component carriers; if the user terminal is scheduled to receive downlink transmissions on a first single downlink component carrier, receiving control information associated with the downlink transmissions to the user terminal on a first set of radio

resources on an uplink primary component carrier associated with said first downlink component carrier; and if the user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier or multiple downlink component carriers, receiving control information associated with the downlink transmissions to the user terminal on a second set of radio resources on the uplink primary component carrier.

[0008] Another exemplary embodiment of the invention comprises a base station for transmitting data to one or more user terminals. The base station comprises a transmitter to transmit user data on one or more downlink component carriers to a user terminal; and a controller to schedule downlink transmissions to the user terminal. The controller is configured to schedule downlink transmissions to the user terminal on one or more downlink component carriers; if the user terminal is scheduled to receive downlink transmissions on a first single downlink component carrier, receive control information associated with the downlink transmissions to the user terminal on a first set of radio resources on an uplink primary component carrier associated with said first downlink component carrier; and, if the user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier or multiple downlink component carriers, receive control information associated with the downlink transmissions to the user terminal on a second set of radio resources on the uplink primary component carrier..

[0009] Another exemplary embodiment of the invention comprises a method of transmitting control information implemented by a user terminal in a mobile communication network. The method comprises receiving an assignment of radio resources for downlink transmissions from a base station; transmitting control information associated with the downlink transmissions on a first set of radio resources on an uplink component carrier if an assignment of a single downlink component carrier for the downlink transmission is received; and transmitting control information associated with the downlink transmissions on a second set of radio resources on the uplink component carrier if an assignment of multiple downlink component carriers for the downlink transmission is received.

[0010] Another exemplary embodiment of the invention comprises a user terminal configured to send control information associated with downlink transmissions on one or more downlink component carriers. The user terminal comprises a receiver to receive

downlink transmissions from a base station; a transmitter to transmit control information associated with the downlink transmission to a base station; and a controller to select radio resources for transmission of control information associated with the downlink transmissions. The controller is configured to select a first set of radio resources on an uplink component carrier if an assignment of a single downlink component carrier for the downlink transmission is received; and select a second set of radio resources on the uplink component carrier if an assignment of multiple downlink component carriers for the downlink transmission is received.

[0011] Another exemplary embodiment of the invention comprises an alternate method of transmitting control information implemented by a user terminal in a mobile communication network. The method comprises receiving an assignment of radio resources for a downlink transmissions from a base station; transmitting control information associated with the downlink transmission on a first set of radio resources on an uplink component carrier if an assignment of a first downlink component carrier for the downlink transmission is received; and transmitting control information associated with the downlink transmission on a second set of radio resources on the uplink component carrier if an assignment of a second downlink component carrier for the downlink transmission is received.

[0012] Another exemplary embodiment of the invention comprises a user terminal configured to send control information associated with downlink transmissions on one or more downlink component carriers. The user terminal comprises a receiver to receive downlink transmissions from a base station; a transmitter to transmit control information associated with the downlink transmission to a base station; and a controller to select radio resources for transmission of control information associated with the downlink transmission. The controller is configured to select a first set of radio resources on an uplink component carrier if an assignment of a first downlink component carrier for the downlink transmission is received; and select a second set of radio resources on the uplink component carrier if an assignment of a second downlink component carrier for the downlink transmission is received.

DETAILED DESCRIPTION

[0026] Referring now to the drawings, Fig. 1 illustrates an exemplary mobile communication network 10 for providing wireless communication services to user terminals 100. Three user terminals 100 are shown in Fig. 1. The user terminals 100 may comprise, for example, cellular telephones, personal digital assistants, smart phones, laptop computers, handheld computers, or other devices with wireless communication capabilities. The mobile communication network 10 comprises a plurality of geographic cell areas or sectors 12. Each geographic cell area or sector 12 is served by a base station 20, which is referred to in LTE as a NodeB or Enhanced NodeB (eNodeB). A single base station 20 may provide service in multiple geographic cell areas or sectors 12. The user terminals 100 receive signals from a serving base

station 20 on one or more downlink (DL) channels, and transmit signals to the base station 20 on one or more uplink (UL) channels.

[0027] For illustrative purposes, an exemplary embodiment of the present invention will be described in the context of a Long-Term Evolution (LTE) system. Those skilled in the art will appreciate, however, that the present invention is more generally applicable to other wireless communication systems, including Wideband Code-Division Multiple Access (WCDMA) and WiMax (IEEE 802.16) systems.

[0028] LTE uses Orthogonal Frequency Division Multiplexing (OFDM) in the downlink and Discrete Fourier Transform (DFT) spread OFDM in the uplink. The basic LTE downlink physical resource can be viewed as a time-frequency grid. Fig. 2 illustrates a portion of an exemplary OFDM time-frequency grid 50 for LTE. Generally speaking, the time-frequency grid 50 is divided into one millisecond subframes. Each subframe includes a number of OFDM symbols. For a normal cyclic prefix (CP) length, suitable for use in situations where multipath dispersion is not expected to be extremely severe, a subframe comprises fourteen OFDM symbols. A subframe comprises twelve OFDM symbols if an extended cyclic prefix is used. In the frequency domain, the physical resources are divided into adjacent subcarriers with a spacing of 15 kHz. The number of subcarriers varies according to the allocated system bandwidth. The smallest element of the time-frequency grid 50 is a resource element. A resource element comprises one OFDM subcarrier during one OFDM symbol interval.

[0029] In LTE systems, data is transmitted to the user terminals over a downlink transport channel known as the Physical Downlink Shared Channel (PDSCH). The PDSCH is a time and frequency multiplexed channel shared by a plurality of user terminals. As shown in Fig. 3, the downlink transmissions are organized into 10 ms radio frames. Each radio frame comprises ten equally-sized subframes. For purposes of scheduling users to receive downlink transmissions, the downlink time-frequency resources are allocated in units called resource blocks (RBs). Each resource block spans twelve subcarriers (which may be adjacent or distributed across the frequency spectrum) and one 0.5 ms slot (one half of one subframe). The term "resource block pair" refers to two consecutive resource blocks occupying an entire one millisecond subframe.

[0030] The base station 20 dynamically schedules downlink transmissions to the user terminals based on channel state and quality information (CSI, CQI) reports from the

user terminals on the Physical Uplink Control Channel (PUCCH) or Physical Uplink Shared Channel (PUSCH). The CQI and CSI reports indicate the instantaneous channel conditions as seen by the receiver. In each subframe, the base station 20 transmits downlink control information (DCI) identifying the user terminals that have been scheduled to receive data (hereinafter the scheduled terminals) in the current downlink subframe and the resource blocks on which the data is being transmitted to the scheduled terminals. The DCI is typically transmitted on the Physical Downlink Control Channel (PDCCH) in the first 1, 2, or 3 OFDM symbols in each subframe.

[0031] Hybrid Automatic Repeat Request (HARQ) is used to mitigate errors that occur during transmission of data on the downlink. When the base station 20 indicates that a user terminal 100 is scheduled to receive a transmission on the PDSCH, the user terminal 100 decodes the PDSCH and transmits an acknowledgement (ACK/NACK) message to base station 20 on the PUCCH or PUSCH. The acknowledgement message informs the base station 20 whether the data packet was correctly received by the user terminal 100. The acknowledgement message could be either a positive acknowledgement (ACK) indicating a successful decoding or a negative acknowledgement (NACK) message indicating a decoding failure. Based on the acknowledgement message received from the user terminal 100, base station 20 determines whether to transmit new data (ACK received) or to retransmit the previous data (NACK received).

[0032] For uplink transmissions, the user terminals transmit scheduling requests (SRs) to the base station 20 on the PUCCH when the user terminals have data to send but no valid uplink grant. The base stations 20 allocate uplink resources responsive to the scheduling requests and transmit a scheduling grant to the user terminal 100 on the PDCCH. When the data is received, the base station 20 transmits ACK/NACK signaling to the user terminal 100 on the Physical Hybrid Automatic Repeat Request Indicator Channel (PHICH) to indicate whether the data is received correctly.

[0033] If the user terminal 100 has not been assigned an uplink resource for data transmission, the L1/L2 control information (CQI reports, ACK/NACKs, and SRs) is transmitted in uplink resources (resource blocks) specifically assigned for uplink transmission of L1/L2 control information on the Physical Uplink Control Channel (PUCCH). As illustrated in Fig. 4, these resources are located at the edges of the total available cell bandwidth. Each PUCCH resource comprises of one resource block

(twelve subcarriers) within each of the two slots of an uplink subframe. Frequency hopping is used to provide frequency diversity. The frequency of the resource blocks alternate at the slot boundary, with one resource block at the upper part of the spectrum within the first slot of a subframe and an equally sized resource block at the lower part of the spectrum during the second slot of the subframe, or vice versa. If more resources are needed for the uplink L1/L2 control signaling, e.g., in case of very large overall transmission bandwidth supporting a large number of users, additional resources blocks can be assigned adjacent the previously assigned resource blocks.

[0034] The reasons for locating the PUCCH resources at the edges of the overall available spectrum are two-fold. First, the allocation maximizes the frequency diversity, particularly when frequency hopping is employed. Second, the allocation avoids fragmentation of the uplink spectrum, which would make it impossible to assign very wide transmission bandwidths to a single user terminal 100 and still retain the single-carrier property of the uplink transmission.

[0035] The bandwidth of one resource block during one subframe is too large for the control signaling needs of a single user terminal 100. Therefore, to efficiently exploit the resources set aside for control signaling, multiple user terminals can share the same resource block. This is done by assigning the different terminals different orthogonal phase rotations of a cell-specific length-12 frequency-domain sequence. A linear phase rotation in the frequency domain is equivalent to applying a cyclic shift in the time domain. Thus, although the term “phase rotation” is used herein, the term cyclic shift is sometimes used with an implicit reference to the time domain.

[0036] The resource used by a PUCCH is therefore not only specified in the time-frequency domain by the resource-block pair, but also by the phase rotation applied. Similarly to the case of reference signals, there are up to twelve different phase rotations specified in the LTE standard, providing up to twelve different orthogonal sequences from each cell-specific sequence. However, in the case of frequency-selective channels, not all the twelve phase rotations can be used if orthogonality is to be maintained. Typically, up to six rotations are considered usable in a cell.

[0037] There are two message formats defined for transmission of control information on the PUCCH, each capable of carrying a different number of bits. A user terminal 100 uses PUCCH format 1 to transmit HARQ acknowledgements and scheduling requests. For CQI reporting, the user terminal 100 uses PUCCH format 2.

[0038] Hybrid-ARQ acknowledgements are used to acknowledge the reception of one (or two in case of spatial multiplexing) transport blocks in the downlink. Scheduling requests are used to request resources for uplink data transmission. A scheduling request is transmitted only when the user terminal 100 is requesting resources, otherwise the user terminal 100 stays silent in order to save battery resources and not create unnecessary interference. For scheduling requests, no explicit information bit is transmitted. Instead, the user terminal requests uplink resources by the presence (or absence) of energy on the corresponding PUCCH. Although HARQ acknowledgements and scheduling requests serve different purposes, they share the same PUCCH format. This format is referred to as PUCCH format 1 in the specifications

[0039] Fig. 5 illustrates the structure of a PUCCH format 1 message. The PUCCH format 1 uses the same structure in each of the two slots of a subframe. For transmission of a HARQ acknowledgement, the single HARQ acknowledgement bit is used to generate a BPSK symbol (in case of downlink spatial multiplexing the two acknowledgement bits are used to generate a QPSK symbol). For a scheduling request, on the other hand, the BPSK/QPSK symbol is replaced by a constellation point treated as negative acknowledgement at the base station 20. The modulation symbol is then used to generate the signal to be transmitted in each of the two PUCCH slots.

[0040] A PUCCH format 1 resource, used for either a HARQ acknowledgement or a scheduling request, is represented by a single scalar resource index. From the index, the phase rotation and the orthogonal cover sequence is derived. For HARQ transmission, the resource index to use for transmission of the HARQ acknowledgement is given implicitly by the DCI transmitted on the PDCCH to schedule the downlink transmission to the user terminal 100. Thus, the resources to use for an uplink HARQ acknowledgement vary dynamically and depend on the DCI used to schedule the user terminal 100 in each subframe.

[0041] In addition to dynamic scheduling based on the DCI transmitted by the base station on the PDCCH, it is also possible to semi-persistently schedule a user terminal 100 according to a specific pattern. In this case the configuration information indicating the semi-persistent scheduling pattern includes information on the PUCCH index to use for the HARQ acknowledgements. The configuration information also informs the user terminal 100 which PUCCH resources to use for transmission of scheduling requests.

[0042] The PUCCH resources are split into two parts: a semi-static part and a dynamic part. The semi-static part of the PUCCH resources is used for scheduling requests and HARQ acknowledgements from semi-persistent users. The amount of resources used for the semi-static part of PUCCH 1 resources does not vary dynamically. The dynamic part is used for dynamically scheduled user terminals. As the number of dynamically scheduled terminals varies, the amount of resources used for the dynamic PUCCHs varies.

[0043] Channel-status reports are used to provide the base station 20 with an estimate of the channel conditions as seen by the user terminal 100 in order to aid channel-dependent scheduling. A channel-status report consists of multiple bits per subframe. PUCCH format 1, which is capable of at most two bits of information per subframe, can not be used for this purpose. Transmission of channel-status reports on the PUCCH is instead handled by PUCCH format 2, which is capable of multiple information bits per subframe.

[0044] PUCCH format 2, illustrated for normal cyclic prefix in Fig. 6, is based on a phase rotation of the same cell-specific sequence as format 1. Similarly to format 1, a format 2 resource can be represented by an index from which the phase rotation and other quantities necessary are derived. The PUCCH format 2 resources are semi-statically configured.

[0045] Both PUCCH format 1 and format 2 signaling messages are transmitted on a resource-block pair with one resource block in each slot. The resource-block pair is determined from the PUCCH resource index. Thus, the resource-block number to use in the first and second slot of a subframe can be expressed as

[0046] $RBnumber(i) = f(\text{PUCCH index}, i)$

[0047] where i is the slot number (0 or 1) within the subframe and f a function found in the specification.

[0048] Multiple resource-block pairs can be used to increase the control-signaling capacity. When one resource-block pair is full, the next PUCCH resource index is mapped to the next resource-block pair in sequence. The mapping is done such that PUCCH format 2 (channel-status reports) is transmitted closest to the edges of the uplink cell bandwidth with the semi-static part of PUCCH format 1 next and finally the

dynamic part of PUCCH format 1 in the innermost part of the bandwidth as shown in Fig. 7.

[0049] Three semi-statically parameters are used to determine the resources to use for the different PUCCH formats:

[0050] • $N_{RB}^{(2)}$, provided as part of the system information, controls on which resource-block pair the mapping of PUCCH format 1 starts

[0051] • $N_{PUCCH}^{(1)}$ controls the split between the semi-static and dynamic part of PUCCH format 1

[0052] • $N_{CS}^{(1)}$ controls the mix of format 1 and format 2 in one resource block. In most cases, the configuration is done such that the two PUCCH formats are mapped to separate sets of resource blocks, but there is also a possibility to have the border between format 1 and 2 within a resource block.

[0053] In order to support bandwidths greater than 20MHz, carrier aggregation will be supported in LTE Rel 10. To maintain backward compatibility with Rel 8 user terminals 100, the available spectrum is divided into Rel-8 compatible component carriers (e.g., 20 Mhz component carriers) as shown in Fig. 8. A user terminal 100 can obtain bandwidth up to 100 MHz by transmitting on multiple component carriers. The use of multiple component carriers for data transmission is known as carrier aggregation.

[0054] The number of aggregated component carriers as well as the bandwidth of the individual component carrier may be different for Uplink (UL) and Downlink (DL). A symmetric configuration refers to the case where the number of component carriers in DL and UL are the same. An asymmetric configuration refers to the case where the number of component carriers is different for the UL and DL. The number of component carriers configured for a geographic cell area 12 may be different from the number of component carriers seen by the user terminal 100. A user terminal 100 may, for example, support more DL component carriers than UL component carriers, even though in the geographic cell area 12 the same number of UL and DL component carriers is offered by the network.

[0055] One consideration for carrier aggregation is how to configure the PUCCH for uplink control signaling from the user terminal. One solution is to transmit the uplink control information on multiple control channels on multiple UL component carriers.

However, this option is likely to result in higher user terminal power consumption and a dependency on specific user terminal capabilities. It may also create implementation issues due to inter-modulation products, and may lead to generally higher complexity for implementation and testing.

[0056] According to some embodiments of the present invention, the PUCCH resources on a single uplink component carrier are used to support downlink transmissions on several downlink component carriers. With this approach, a user terminal 100 transmit HARQ signaling associated with downlink transmissions on two or more downlink component carriers on PUCCH resources on a single uplink component carrier. Similarly, a single uplink component carrier may be used to support uplink transmissions on several uplink component carriers. For example, a user terminal 100 may use PUCCH resources on a single uplink component carrier to request uplink resources on multiple uplink component carriers. The uplink component carrier on which PUCCH resources are used to support downlink or uplink transmissions on two or more component carriers is referred to herein as uplink primary component carrier (UL PCC) or uplink associated with the primary cell (PCell).

[0057] For HARQ signaling, a straight-forward approach would be to increase the PUCCH resources on the UL PCC for PUCCH format 1 by a factor of N, where N is the number of aggregated downlink component carriers supported. However, consideration should be given to the typical expected use case. Not all user terminals 100 will be scheduled to receive downlink transmission on multiple downlink component carriers. The number of downlink component carriers used for transmission will be user terminal specific and will vary dynamically as user terminals 100 are scheduled. With bursty data-transmission, the number of user terminals 100 simultaneously assigned resources on several downlink carriers is expected to be rather small. Multiple downlink component carriers are only needed when there are not enough resources on a single component carrier, and there appears to be no benefits from assigning several smaller transport blocks on multiple downlink component carriers for a large number of user terminals 100. Therefore, the design of the ACK/NACK feedback on PUCCH should be optimized for a low number of simultaneous user terminals 100 with assignments on multiple downlink component carrier.

[0058] Considering that the typical use case is a rather small number of user terminals 100 simultaneously assigned resources on multiple downlink component carriers,

increasing the overhead with a factor of N is probably not necessary. Rather, the amount of resources should be chosen in anticipation on the number of user terminals 100 that simultaneously are expected to have assignments on multiple downlink component carriers, which is expected to be scenario and implementation dependent. This could be achieved by configuring a set of uplink resources upon which the currently scheduled user terminal(s) 100 using multiple component carriers transmit the ACK/NACK feedback.

[0059] According to a first approach, a set of shared PUCCH resources of potentially configurable size, in addition to PUCCH resources according to LTE Rel-8, is allocated for HARQ acknowledgements by user terminals 100 which receive downlink assignments on multiple downlink component carriers. The resource set and/or the size of the resource set can be transmitted to the user terminal by Radio Resource Control (RRC) signaling. With this approach, the UL PCC contains PUCCH resources according to LTE Rel-8 for HARQ acknowledgements from user terminals 100 assigned resources for downlink transmission on a single downlink component carrier associated with the UL PCC. The shared PUCCH resource would be used by user terminals 100 which receive resource assignments for downlink transmission on multiple downlink component carriers. There may be some circumstances, such as retransmissions, when the user terminal 100 is assigned resources on a single downlink component carrier that is different from the downlink component carrier associated with the UL PCC. In such a case the shared set of PUCCH resources can also be used for such “cross-carrier” HARQ acknowledgements.

[0060] According to a second approach, a set of shared PUCCH resources of potentially configurable size, in addition to PUCCH resources according to LTE Rel-8, is allocated for HARQ acknowledgements by user terminals 100 which receive downlink assignments on at least one downlink component carrier other than the downlink component carrier having associated Rel- 8 resources on the UL PCC. The resource set and/or the size of the resource set can be transmitted to the user terminal by RRC signaling.

[0061] With either of the above approaches, the set of shared PUCCH resources may be made visible to the user terminal 100 in the same way as for LTE Rel-8 user terminals 100, namely in the form of an association rule between the DL PDCCH CCE and index to PUCCH resource. Thus, from a system perspective, the two sets of

PUCCH resources could overlap or be interleaved. In principle, a user terminal 100 could be configured with semi-static PUCCH resources for HARQ acknowledgements and then use these resources for HARQ acknowledgements in case of multiple DL component carrier assignments. By configuring all the user terminals 100 in the cell to have the same semi-static ACK/NACK resources, such a scheme would allow for assigning at most a single user terminal multiple DL component carrier at the same time. When there is no need for HARQ acknowledgements of multiple carriers, the resource could of course be used for data transmission. The user terminals 100 could select which shared PUCCH resources to use based on component carrier, DL PDDCH CCE, C-RNTI and other parameters. There is though a risk for collisions or scheduling constraints, and to reduce this, one could consider having a dynamic indicator to aid the selection of PUCCH resource. The dynamic indication allows managing the ACK/NACK resources more carefully which is of interest when the amount of resources reserved for HARQ acknowledgements is small and orthogonality is desired.

[0062] In one exemplary embodiment, semi-static PUCCH resources are reserved for user terminals 100 configured with multiple downlink component carriers. The assignment of PUCCH resources can be achieved by implicit indication of actual resource block, e.g., utilizing CCE index, number of the downlink component carriers, RNTI or a combination of these parameters. Alternatively, reserved PUCCH resources can be indicated explicitly via signaling to the user terminal 100 (e.g., RRC signaling), or by a combination of implicit and explicit signaling. Additionally, dynamic indication of PUCCH resources for HARQ acknowledgements can be done by using additional relative or explicit dynamic indication to select actual PUCCH resources out of the set of implicit/explicitly reserved (e.g., semi-statically reserved) resources. For example, the base station 20 may send as a control message or part of a control message, an indicator, referred to herein as an acknowledgement resource indication (ARI), comprising a single bit to indicate that the user terminal 100 should use the next available PUCCH resource or the next cyclically available PUCCH resource from the set of semi-statically reserved PUCCH resources. In some embodiments, the ARI may comprise the entire control message. In other embodiment, the ARI may be included as an information element in a larger control message. Alternatively, the base station 20 can send a multi-bit ARI to indicate the actual PUCCH resource out of the set of semi-statically reserved PUCCH resources.

[0063] There may be at least two different mappings to PUCCH resources on the UL PCC. A first resource mapping may be used for HARQ acknowledgements of downlink transmissions on a single designated downlink component carrier, and a second mapping for HARQ acknowledgements of downlink transmissions on at least one other downlink component carrier. The two mappings may be described by parameters, such as first resource and size of resource set that are configurable by means of higher layer signaling. The user terminal 100 may, based on the detected downlink assignments on one or several downlink component carriers, select one of the two mappings. In a preferred embodiment, the first mapping coincides with the Rel-8 mapping rules for ACK/NACK resources.

[0064] The user terminal 100 may, depending on the detected downlink assignments, and the downlink component carriers on which the downlink assignment was sent, select which mapping to use. Two approaches may be used by the user terminal 100 to select the mapping of radio resources for uplink control signaling. In the first approach, the user terminal 100 selects a first mapping if downlink assignment of a single downlink component carrier is detected and the downlink assignment is sent on the associated downlink component carrier. The user terminal 100 selects a second mapping if it detects at least one downlink assignment for at least one downlink component carrier different from the single associated downlink component carrier (for which there are Rel-8 ACK/NACK resources). In a second approach, the user terminal selects a mapping depending on the number of component carriers it detects for downlink assignments for downlink transmissions.

[0065] Fig. 9 illustrates an exemplary method 50 implemented by a base station 20 in a communication network 10 of receiving uplink control information from a user terminal 100 depending on the assignment of downlink component carriers. The base station 20 schedules the user terminal 100 to receive downlink transmissions on one or more downlink component carriers (block 52). The user terminal 100 may be scheduled to receive downlink transmissions on a single downlink component carrier associated with a primary uplink component carrier. In this case, the base station 20 receives control information associated with the downlink transmissions to the user terminal 100 on a first set of radio resources on the uplink primary component carrier (block 54). Alternatively, the user terminal 100 may be scheduled to receive downlink transmissions on multiple downlink component carriers, or on a single downlink component carrier other than the

downlink component carrier associated with the uplink primary component carrier. In this alternative case, the base station 20 receives uplink control information associated with the downlink transmissions from the user terminal 100 on a second set of radio resources on the uplink component carrier (block 56).

[0066] Fig. 10 illustrates an exemplary method 60 implemented by a user terminal of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 62). If the user terminal 100 detects assignments of radio resources for a single downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on an uplink primary component carrier, uplink control information associated with the downlink transmissions (block 64). On the other hands, if the user terminal 100 receives assignments for multiple downlink component carriers, the user terminal 100 transmits, on a second set of radio resources on the uplink primary component carrier, uplink control information associated with downlink transmissions (block 66).

[0067] Fig. 11 illustrates another exemplary method 70 implemented by a user terminal 100 of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 72). If the user terminal 100 detects assignments of radio resources for a first downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on a uplink primary component carrier, uplink control information associated with the downlink transmissions (block 74). On the other hands, if the user terminal 100 receives assignments for a second downlink component carrier, the user terminal 100 transmits, on a second set of radio resources on the primary uplink component carrier, uplink control information associated with downlink transmissions (block 76).

[0068] Fig. 12 illustrates an exemplary base station 20 according to the present invention. The base station 20 comprises a transceiver 22 for communicating with user terminals and processing circuit 32 for processing the signals transmit and received by the transceiver 22. The transceiver 22 includes a transmitter 24 coupled to one or more transmit antennas 28 and receiver 26 coupled to one or more receive antennas 30. The same antenna(s) 28, 30 may be used for both transmission and reception. The processing circuit 32 may be implemented by one or more processors, hardware, firmware or a combination thereof. Typical functions of the processing circuit 32 include modulation and coding of transmitted signals, and the demodulation and decoding of

received signals. The processing circuit 32 also includes a controller 34 for controlling the operation of the base station 20. The controller 34 is responsible for transmission of downlink control information on the PDCCH, and for the processing of uplink control information received on the PUCCH.

[0069] Fig. 13 illustrates a functional block diagram of an exemplary user terminal 100. The user terminal 100 comprises a transceiver 110 and a processing circuit 120. The transceiver 110 comprises a transmitter 112 coupled to one or more transmit antennas 114, and a receiver 116, coupled to one or more receive antennas 118. Those skilled in the art will appreciate that the same antennas may be used for transmission and reception. The processing circuit 120 processes signals transmitted and received by the transceiver 110. The processing circuit 120 comprises one or more processors, hardware, firmware, or a combination thereof. Typical functions of the processing circuit 120 include modulation and coding of transmitted signals, and the demodulation and decoding of received signals. The processing circuit 120 includes a controller 122 for controlling uplink transmissions and the reception of downlink transmissions. The controller 122 generates uplink control information for transmission on the PUCCH, and processes downlink control information received on the PDCCH as previously described.

[0070] The invention provides means for efficient transmission of PUCCH on one component carrier corresponding to multiple downlink component carriers, without creating implementation problems in the user terminal or being over-dimensioned and therefore inefficient.

[0071] The present invention may, of course, be carried out in other specific ways than those herein set forth without departing from the scope and essential characteristics of the invention. The present embodiments are, therefore, to be considered in all respects as illustrative and not restrictive, and all changes coming within the meaning and equivalency range of the appended claims are intended to be embraced therein.

CLAIMS

What is claimed is:

1. A method implemented by a base station of receiving control information from a user terminal, the method comprising:
 - scheduling downlink transmissions to a first user terminal on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;
 - receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and
 - receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.
2. The method of claim 1, wherein the first and second sets of radio resources are different.
3. The method of claim 2, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.
4. The method of claim 1, further comprising transmitting control information to the first user terminal to explicitly indicate the first set of radio resources on the uplink component carrier associated with the primary cell.

5. The method of claim 1, further comprising providing the first user terminal with an implicit indication to dynamically assign radio resources in said first set of radio resources.
6. The method of claim 5, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) used for scheduling the first user terminal.
7. The method of claim 1, further comprising transmitting control information to the second user terminal on a downlink component carrier to implicitly or explicitly indicate the second set of radio resources on the uplink component carrier associated with the primary cell.
8. The method of claim 7, wherein at least one of the first and second sets of radio resources is indicated explicitly by an uplink control channel resource index.
9. The method of claim 8, wherein an explicit indication related to the second set of radio resources is transmitted as radio resource control signaling.
10. The method of claim 1, further comprising transmitting, on the single downlink component carrier, an indication to assign radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell
11. The method of claim 10, wherein the indication to assign radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources to the second user terminal when the second user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
12. The method of claim 11, wherein the acknowledgement resource indication selects radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources.

13. The method of claim 1, further comprising:
 - receiving control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

14. The method of claim 1, further comprising:
 - if the first user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier associated with a non-primary cell, receiving control information associated with the downlink transmissions to the first user terminal on the second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the second single downlink component carrier.

15. The method of claim 1, wherein the first user equipment is the same as the second user equipment.

16. The method of claim 1, wherein the first user equipment is different from the second user equipment.

17. A base station comprising:

a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and

a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:

schedule downlink transmissions to the first user terminal on a single downlink component carrier associated with a primary cell and schedule downlink transmissions to the second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;

receive, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and

receive, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

18. A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:
- receiving an assignment of radio resources for downlink transmissions from a base station;
 - transmitting, on a first set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and
 - transmitting, on a second set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmission, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.
19. The method of claim 18, wherein the first and second sets of radio resources are different.
20. The method of claim 19, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.
21. The method of claim 18, further comprising receiving control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.
22. The method of claim 21, wherein said receiving the control information comprises receiving an uplink control channel resource index explicitly indicating said first set of radio resources.

23. The method of claim 22, wherein an explicit indication relating to the second set of radio resources is received as radio resource control signaling.
24. The method of claim 18, further comprising receiving an implicit indication to dynamically assign radio resources in said first set of radio resources.
25. The method of claim 24, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.
26. The method of claim 18, further comprising receiving, on the single downlink component carrier, an indication to assign radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
27. The method of claim 26, wherein the indication to assign radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
28. The method of claim 27, further comprising selecting radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.
29. The method of claim 18, further comprising:
transmitting control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

30. A user terminal for mobile communications, the user terminal comprising:
- a receiver to receive downlink transmissions from a base station;
 - a transmitter to transmit control information associated with the downlink transmission to a base station; and
 - a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to:
 - select a first set of radio resources responsive to being assigned radio resources on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and
 - select a second set of radio resources responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

ABSTRACT

Systems and methods of signaling uplink control information in a mobile communication network using carrier aggregation are provided. In one exemplary embodiment, a method may include scheduling downlink transmissions to a first user terminal on a single downlink component carrier (CC) associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink CCs or on a downlink CC associated with a non-primary cell. Further, the method may include receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal. In addition, the method may include receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

Application Data Sheet 37 CFR 1.76		Attorney Docket Number	4015-9600 / P30138-US3
		Application Number	
Title of Invention	PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCED		
The application data sheet is part of the provisional or nonprovisional application for which it is being submitted. The following form contains the bibliographic data arranged in a format specified by the United States Patent and Trademark Office as outlined in 37 CFR 1.76. This document may be completed electronically and submitted to the Office in electronic format using the Electronic Filing System (EFS) or the document may be printed and included in a paper filed application.			

Secrecy Order 37 CFR 5.2:

Portions or all of the application associated with this Application Data Sheet may fall under a Secrecy Order pursuant to 37 CFR 5.2 (Paper filers only. Applications that fall under Secrecy Order may not be filed electronically.)

Filing By Reference:

Only complete this section when filing an application by reference under 35 U.S.C. 111(c) and 37 CFR 1.57(a). Do not complete this section if application papers including a specification and any drawings are being filed. Any domestic benefit or foreign priority information must be provided in the appropriate section(s) below (i.e., "Domestic Benefit/National Stage Information" and "Foreign Priority Information").

For the purposes of a filing date under 37 CFR 1.53(b), the description and any drawings of the present application are replaced by this reference to the previously filed application, subject to conditions and requirements of 37 CFR 1.57(a).

Application number of the previously filed application	Filing date (YYYY-MM-DD)	Intellectual Property Authority or Country

Publication Information:

Request Early Publication (Fee required at time of Request 37 CFR 1.219)

Request Not to Publish. I hereby request that the attached application not be published under 35 U.S.C. 122(b) and certify that the invention disclosed in the attached application **has not and will not** be the subject of an application filed in another country, or under a multilateral international agreement, that requires publication at eighteen months after filing.

Representative Information:

Representative information should be provided for all practitioners having a power of attorney in the application. Providing this information in the Application Data Sheet does not constitute a power of attorney in the application (see 37 CFR 1.32). Either enter Customer Number or complete the Representative Name section below. If both sections are completed the customer number will be used for the Representative Information during processing.

Domestic Benefit/National Stage Information:

This section allows for the applicant to either claim benefit under 35 U.S.C. 119(e), 120, 121, 365(c), or 386(c) or indicate National Stage entry from a PCT application. Providing benefit claim information in the Application Data Sheet constitutes the specific reference required by 35 U.S.C. 119(e) or 120, and 37 CFR 1.78.

When referring to the current application, please leave the "Application Number" field blank.

Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55. When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX)ⁱ the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(i)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications

This application (1) claims priority to or the benefit of an application filed before March 16, 2013 and (2) also contains, or contained at any time, a claim to a claimed invention that has an effective filing date on or after March 16, 2013.

NOTE: By providing this statement under 37 CFR 1.55 or 1.78, this application, with a filing date on or after March 16, 2013, will be examined under the first inventor to file provisions of the AIA.

Authorization or Opt-Out of Authorization to Permit Access:

When this Application Data Sheet is properly signed and filed with the application, applicant has provided written authority to permit a participating foreign intellectual property (IP) office access to the instant application-as-filed (see paragraph A in subsection 1 below) and the European Patent Office (EPO) access to any search results from the instant application (see paragraph B in subsection 1 below).

Should applicant choose not to provide an authorization identified in subsection 1 below, applicant **must opt-out** of the authorization by checking the corresponding box A or B or both in subsection 2 below.

NOTE: This section of the Application Data Sheet is **ONLY** reviewed and processed with the **INITIAL** filing of an application. After the initial filing of an application, an Application Data Sheet cannot be used to provide or rescind authorization for access by a foreign IP office(s). Instead, Form PTO/SB/39 or PTO/SB/69 must be used as appropriate.

1. Authorization to Permit Access by a Foreign Intellectual Property Office(s)

A. Priority Document Exchange (PDX) - Unless box A in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the State Intellectual Property Office of the People's Republic of China (SIPO), the World Intellectual Property Organization (WIPO), and any other foreign intellectual property office participating with the USPTO in a bilateral or multilateral priority document exchange agreement in which a foreign application claiming priority to the instant patent application is filed, access to: (1) the instant patent application-as-filed and its related bibliographic data, (2) any foreign or domestic application to which priority or benefit is claimed by the instant application and its related bibliographic data, and (3) the date of filing of this Authorization. See 37 CFR 1.14(h)(1).

B. Search Results from U.S. Application to EPO - Unless box B in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the EPO access to the bibliographic data and search results from the instant patent application when a European patent application claiming priority to the instant patent application is filed. See 37 CFR 1.14(h)(2).

The applicant is reminded that the EPO's Rule 141(1) EPC (European Patent Convention) requires applicants to submit a copy of search results from the instant application without delay in a European patent application that claims priority to the instant application.

2. Opt-Out of Authorizations to Permit Access by a Foreign Intellectual Property Office(s)

A. Applicant **DOES NOT** authorize the USPTO to permit a participating foreign IP office access to the instant application-as-filed. If this box is checked, the USPTO will not be providing a participating foreign IP office with any documents and information identified in subsection 1A above.

B. Applicant **DOES NOT** authorize the USPTO to transmit to the EPO any search results from the instant patent application. If this box is checked, the USPTO will not be providing the EPO with search results from the instant application.

NOTE: Once the application has published or is otherwise publicly available, the USPTO may provide access to the application in accordance with 37 CFR 1.14.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

This collection of information is required by 37 CFR 1.76. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 23 minutes to complete, including gathering, preparing, and submitting the completed application data sheet form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

- 1 The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
- 2 A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
- 3 A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
- 4 A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
- 5 A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
- 6 A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
- 7 A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
- 8 A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
- 9 A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

INFORMATION DISCLOSURE STATEMENT

In accordance with 37 C.F.R. 1.56, counsel wishes to make of record the attached items of information for the Examiner's consideration in connection with this application. The references in the attached listing were previously submitted in parent application Serial No. 12/896,993 and relied upon under 35 USC 120. Copies of these references are not furnished with this listing as they were previously submitted and considered in the parent application. Also attached is Form PTO/SB/08A for the Examiner's convenience in making such consideration of record. Inclusion herein of any particular item of information is not to be construed as an admission that same is prior art. Each item of information contained in the information disclosure statement:

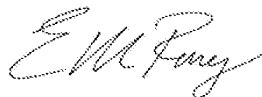

was first cited in any communication from a patent office in a counterpart foreign or international application or from the Office, and this communication was not received by an individual designated in §1.56(c) more than thirty days prior to the filing of the information disclosure statement; or

is a communication that was issued by a patent office in a counterpart foreign or international application or by the Office, and this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement

No statement re Patent Term Adjustment (PTA).

The Commissioner is hereby authorized to charge any fees that may be required or credit any overpayment to Deposit Account 18-1167.

Respectfully submitted,
COATS & BENNETT, P.L.L.C.

INFORMAL NOTICE

Date Mailed: 11/22/2016

INFORMATIONAL NOTICE TO APPLICANT

Applicant is notified that the above-identified application contains the deficiencies noted below. No period for reply is set forth in this notice for correction of these deficiencies. However, if a deficiency relates to the inventor's oath or declaration, the applicant must file an oath or declaration in compliance with 37 CFR 1.63, or a substitute statement in compliance with 37 CFR 1.64, executed by or with respect to each actual inventor no later than the expiration of the time period set in the "Notice of Allowability" to avoid abandonment. See 37 CFR 1.53(f).

The item(s) indicated below are also required and should be submitted with any reply to this notice to avoid further processing delays.

- A properly executed inventor's oath or declaration has not been received for the following inventor(s):
David Astely
Robert Baldemair
Dirk Gerstenberger
Daniel Larsson
Lars Lindbom
Stefan Parkvall

Questions about the contents of this notice and the requirements it sets forth should be directed to the Office of Data Management, Application Assistance Unit, at (571) 272-4000 or (571) 272-4200 or 1-888-786-0101.

Date Mailed: 11/22/2016

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections

370

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific

page 2 of 4

countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop

technology, manufacture products, deliver services, and grow your business, visit <http://www.SelectUSA.gov> or call +1-202-482-6800.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

In accordance with 37 C.F.R. 1.56, counsel wishes to make of record the attached items of information for the Examiner's consideration in connection with this application. Also attached is Form PTO/SB/08A for the Examiner's convenience in making such consideration of record. Inclusion herein of any particular item of information is not to be construed as an admission that same is prior art. Each item of information contained in the information disclosure statement:

- was first cited in any communication from a patent office in a counterpart foreign or international application or from the Office, and this communication was not received by an individual designated in §1.56(c) more than thirty days prior to the filing of the information disclosure statement; or
- is a communication that was issued by a patent office in a counterpart foreign or international application or by the Office, and this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement
- No statement re Patent Term Adjustment (PTA).

The Commissioner is hereby authorized to charge any fees that may be required or credit any overpayment to Deposit Account 18-1167.

Respectfully submitted,
 COATS & BENNETT, P.L.L.C.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

See attached certification statement.

The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PUBLICATION NOTICE

Title: PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCED

Publication No. US-2017-0063506-A1

Publication Date: 03/02/2017

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently http://www.uspto.gov/patft/.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (571) 272-3150 or (800) 972-6382, by facsimile at (571) 273-3250, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently http://pair.uspto.gov/. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Table with 5 columns: APPLICATION NO., FILING DATE, FIRST NAMED INVENTOR, ATTORNEY DOCKET NO., CONFIRMATION NO. Includes application details for David Astely and examiner information for Talukder, MD K.

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

1. The present application is being examined under the pre-AIA first to invent provisions.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an non-provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-30 of instant application are non-provisionally rejected on the ground nonstatutory obviousness-type double patenting as being unpatentable over claims 1-40 of application No. 12/896993 (US Pat. 9497004). Although the conflicting claims are not identical, they are not patentable distinct from each other because both the claims of the instant application and the claims of the copending application are almost the same in scope. Omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same function as before. In re KARLSON (CCPA) 136 USPQ 184 (1963).

An omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same function as before. In re KARLSON (CCPA) 136 USPQ 184 (1963).

Claims are not identical, however, the scope of the invention are the same.

Instant Application (15/350360)	Application (12/896993)
<p>Claim 1: A method implemented by a base station of receiving control information from a user terminal, the method comprising:</p> <p>scheduling downlink transmissions to a first user terminal on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;</p> <p>receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and</p> <p>receiving, on a second set of radio resources, control information associated with the downlink transmissions</p>	<p>Claim 1: A method implemented by a base station of receiving control information from a user terminal, the method comprising:</p> <p>scheduling downlink transmissions to a first user terminal on a single downlink component carrier associated with a primary cell and a second user terminal on multiple downlink component carriers including the single downlink component carrier associated with the primary cell;</p> <p>receiving control information associated with the downlink transmissions to the first user terminal on a first set of radio resources on an uplink component carrier associated with the primary cell, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the single downlink component carrier associated with the primary cell; receiving control information associated</p>

<p>to the second user terminal, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.</p>	<p>with the downlink transmissions to the second user terminal on a second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the multiple downlink component carriers and the second set of resources are additional resources as compared to the first set of resources;</p> <p>and transmitting, on the single downlink component carrier, an indication to assign radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers.</p>
<p>Claim 17: A base station comprising:</p> <p>a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:</p> <p>schedule downlink transmissions to the first user terminal on a single downlink component carrier associated with a primary cell and schedule downlink transmissions to the second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell; receive, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and</p>	<p>Claim 9: A base station comprising:</p> <p>a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:</p> <p>schedule downlink transmissions to the first user terminal on a single downlink component carrier associated with a primary cell and the second user terminal on multiple downlink component carriers including the single downlink component carrier associated with the primary cell; receive control information associated with the downlink transmissions to the first user terminal on a first set of radio resources on an uplink component carrier associated with the primary cell, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the single downlink component carrier</p>

<p>receive, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.</p>	<p>associated with the primary cell;</p> <p>receive control information associated with the downlink transmissions to the second user terminal on a second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the multiple downlink component carriers and the second set of resources are additional resources as compared to the first set of resources; and transmit, on the single downlink component carrier, an indication to assign radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers.</p>
<p>Claim 18: A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:</p> <p>receiving an assignment of radio resources for downlink transmissions from a base station;</p> <p>transmitting, on a first set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and</p> <p>transmitting, on a second set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmission, wherein the second set of radio resources is reserved for user terminals</p>	<p>Claim 17: A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:</p> <p>receiving an assignment of radio resources for downlink transmissions from a base station;</p> <p>transmitting, on a first set of radio resources on an uplink component carrier associated with a primary cell, control information associated with the downlink transmissions responsive to receiving an assignment of radio resources on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the single downlink component carrier associated with the primary cell;</p> <p>transmitting, on a second set of radio resources on the uplink component carrier associated with the primary cell, control information associated with the downlink transmissions responsive to receiving an assignment of radio resources on multiple downlink component carriers including</p>

<p>scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.</p>	<p>the single downlink component carrier associated with the primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the multiple downlink component carriers and the second set of resources are additional resources as compared to the first set of resources; and receiving, on the single downlink component carrier, an indication to assign radio resources on the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers</p>
<p>Claim 30: A user terminal for mobile communications, the user terminal comprising: a receiver to receive downlink transmissions from a base station; a transmitter to transmit control information associated with the downlink transmission to a base station; and</p> <p>a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to: select a first set of radio resources responsive to being assigned radio resources on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and</p> <p>select a second set of radio resources responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier</p>	<p>Claim 24: A user terminal for mobile communications, the user terminal comprising: a receiver to receive downlink transmissions from a base station; a transmitter to transmit control information associated with the downlink transmissions to a base station; and</p> <p>a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to: select a first set of radio resources on an uplink component carrier associated with a primary cell responsive to receiving an assignment of radio resources on a single downlink component carrier associated with the primary cell for the downlink transmissions, wherein the first set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the single downlink component carrier associated with the primary cell;</p> <p>select a second set of radio resources on the uplink component carrier associated with the primary cell responsive to receiving an assignment of radio resources on multiple downlink component carriers including the single downlink component carrier associated with the primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for user terminals scheduled to receive downlink transmissions on the multiple downlink</p>

associated with the primary cell.	component carriers and the second set of resources are additional resources as compared to the first set of resources; and receive, on the single downlink component carrier, an indication to assign radio resources on the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MD TALUKDER whose telephone number is (571)270-3222. The examiner can normally be reached on Monday to Friday (Alt Friday off) from (9:30 to 4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wesley Kim can be reached on 571-272-7867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

See attached certification statement.

The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Signature	/Edward M. Roney/	Date (YYYY-MM-DD)	2016-11-14
Name/Print	Edward M. Roney	Registration Number	62048

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

See attached certification statement.

The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Signature	/Edward M. Roney/	Date (YYYY-MM-DD)	2016-01-08
Name/Print	Edward M. Roney	Registration Number	62048

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

STATEMENT UNDER 37 CFR 3.73(c)Applicant/Patent Owner: Telefonaktiebolaget LM Ericsson (publ)Application No./Patent No.: 15/350360 Filed/Issue Date: November 14, 2016Titled: PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCEDTelefonaktiebolaget LM Ericsson (publ), a Swiss corporation

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. The assignee of the entire right, title, and interest.
2. An assignee of less than the entire right, title, and interest (check applicable box):
- The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.
- There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. The recipient, via a court proceeding or the like (e.g., bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

- A. An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 040308, Frame 0388, or for which a copy thereof is attached.
- B. A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:
1. From: _____ To: _____
The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.
2. From: _____ To: _____
The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

[Page 1 of 2]

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

STATEMENT UNDER 37 CFR 3.73(c)

3. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

4. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

5. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

6. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

Additional documents in the chain of title are listed on a supplemental sheet(s).

As required by 37 CFR 3.73(c)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN APPLICATION DATA SHEET (37 CFR 1.76)

Title of Invention: PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCED

As the below named inventor, I hereby declare that:

This declaration is directed to:

The attached application, or
 United States application number 15/350,360 filed on November 14, 2016 or PCT international application _____ filed on _____

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.

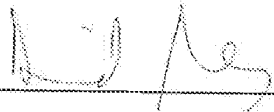

I hereby acknowledge that any willful false statement made in the declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.

I hereby state that I have reviewed and understand the contents of the above-identified application, including the claims.

I hereby acknowledge the duty to disclose information which is material to patentability as defined in 37 C.F.R. 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

Doc Code: DIST.E.FILE Document Description: Electronic Terminal Disclaimer - Filed		PTO/SB/26 U.S. Patent and Trademark Office Department of Commerce
Electronic Petition Request	TERMINAL DISCLAIMER TO OBIVIATE A DOUBLE PATENTING REJECTION OVER A "PRIOR" PATENT	
Application Number	15350360	
Filing Date	14-Nov-2016	
First Named Inventor	David Astely	
Attorney Docket Number	4015-9600 / P30138-US3	
Title of Invention	PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCED	
<input checked="" type="checkbox"/> Filing of terminal disclaimer does not obviate requirement for response under 37 CFR 1.111 to outstanding Office Action <input checked="" type="checkbox"/> This electronic Terminal Disclaimer is not being used for a Joint Research Agreement.		
Owner	Percent Interest	
Telefonaktiebolaget LM Ericsson (publ)	100%	
<p>The owner(s) with percent interest listed above in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of prior patent number(s)</p> <p>9497004</p> <p>as the term of said prior patent is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the prior patent are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.</p> <p>In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the prior patent, "as the term of said prior patent is presently shortened by any terminal disclaimer," in the event that said prior patent later:</p> <ul style="list-style-type: none"> - expires for failure to pay a maintenance fee; - is held unenforceable; - is found invalid by a court of competent jurisdiction; - is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321; - has all claims canceled by a reexamination certificate; - is reissued; or - is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer. <p><input checked="" type="radio"/> Terminal disclaimer fee under 37 CFR 1.20(d) is included with Electronic Terminal Disclaimer request.</p>		

<input type="radio"/> I certify, in accordance with 37 CFR 1.4(d)(4), that the terminal disclaimer fee under 37 CFR 1.20(d) required for this terminal disclaimer has already been paid in the above-identified application.	
Applicant claims the following fee status:	
<input type="radio"/> Small Entity <input type="radio"/> Micro Entity <input checked="" type="radio"/> Regular Undiscounted	
I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.	
THIS PORTION MUST BE COMPLETED BY THE SIGNATORY OR SIGNATORIES	
I certify, in accordance with 37 CFR 1.4(d)(4) that I am:	
<input checked="" type="radio"/> An attorney or agent registered to practice before the Patent and Trademark Office who is of record in this application Registration Number <u>68795</u>	
<input type="radio"/> A sole inventor	
<input type="radio"/> A joint inventor; I certify that I am authorized to sign this submission on behalf of all of the inventors as evidenced by the power of attorney in the application	
<input type="radio"/> A joint inventor; all of whom are signing this request	
Signature	/Brandee N. Woolard, Reg. No. 68,795/
Name	Brandee N. Woolard

*Statement under 37 CFR 3.73(b) is required if terminal disclaimer is signed by the assignee (owner).
 Form PTO/SB/96 may be used for making this certification. See MPEP § 324.

RESPONSE TO OFFICE ACTION

This paper is being filed in response to the Office Action mailed 22 March 2017 having a reply due date of 22 June 2017. Reconsideration is respectfully requested in light of the amendments and/or remarks below. The Office is hereby authorized to charge any fees required for entry of this paper to Deposit Account 18-1167.

CLAIMS LISTING

1. (Currently Amended) A method implemented by a base station of receiving control information from a user terminal, the method comprising:
 - scheduling downlink transmissions to a first user terminal only on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;
 - receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and
 - receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

2. (Original) The method of claim 1, wherein the first and second sets of radio resources are different.

3. (Original) The method of claim 2, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.

4. (Original) The method of claim 1, further comprising transmitting control information to the first user terminal to explicitly indicate the first set of radio resources on the uplink component carrier associated with the primary cell.

5. (Original) The method of claim 1, further comprising providing the first user terminal with an implicit indication to dynamically assign radio resources in said first set of radio resources.

6. (Original) The method of claim 5, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) used for scheduling the first user terminal.

7. (Original) The method of claim 1, further comprising transmitting control information to the second user terminal on a downlink component carrier to implicitly or explicitly indicate the second set of radio resources on the uplink component carrier associated with the primary cell.

8. (Original) The method of claim 7, wherein at least one of the first and second sets of radio resources is indicated explicitly by an uplink control channel resource index.

9. (Original) The method of claim 8, wherein an explicit indication related to the second set of radio resources is transmitted as radio resource control signaling.

10. (Currently Amended) The method of claim 1, further comprising transmitting, on the single downlink component carrier, an ~~indication to assignment of~~ indication to assignment of radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell

11. (Currently Amended) The method of claim 10, wherein the ~~indication to assignment of~~ indication to assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources to the second user terminal when the second user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

12. (Original) The method of claim 11, wherein the acknowledgement resource indication selects radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources.

13. (Original) The method of claim 1, further comprising:

receiving control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

14. (Currently Amended) The method of claim 1, further comprising:

if the first user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier associated with a non-primary cell, receiving control information associated with the downlink transmissions to the first user terminal on the second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on the second single downlink component carrier.

15. (Original) The method of claim 1, wherein the first user equipment is the same as the second user equipment.

16. (Original) The method of claim 1, wherein the first user equipment is different from the second user equipment.

17. (Currently Amended) A base station comprising:

a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and

a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:

schedule downlink transmissions to the first user terminal only on a single downlink component carrier associated with a primary cell and schedule downlink transmissions to the second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;

receive, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and

receive, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

18. (Currently Amended) A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:

receiving an assignment of radio resources for downlink transmissions from a base station;

transmitting, on a first set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and

transmitting, on a second set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmission, wherein the second set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

19. (Original) The method of claim 18, wherein the first and second sets of radio resources are different.

20. (Original) The method of claim 19, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.

21. (Original) The method of claim 18, further comprising receiving control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.

22. (Original) The method of claim 21, wherein said receiving the control information comprises receiving an uplink control channel resource index explicitly indicating said first set of radio resources.

23. (Original) The method of claim 22, wherein an explicit indication relating to the second set of radio resources is received as radio resource control signaling.

24. (Original) The method of claim 18, further comprising receiving an implicit indication to dynamically assign radio resources in said first set of radio resources.

25. (Original) The method of claim 24, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.

26. (Currently Amended) The method of claim 18, further comprising receiving, on the single downlink component carrier, an ~~indication to assignment of~~ indication to assignment of radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

27. (Currently Amended) The method of claim 26, wherein the ~~indication to assignment of~~ indication to assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

28. (Original) The method of claim 27, further comprising selecting radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.

29. (Original) The method of claim 18, further comprising:
transmitting control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

30. (Currently Amended) A user terminal for mobile communications, the user terminal comprising:

a receiver to receive downlink transmissions from a base station;

a transmitter to transmit control information associated with the downlink transmission to a base station; and

a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to:

select a first set of radio resources responsive to being assigned radio resources only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and
select a second set of radio resources responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for a user terminal[[s]] scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

REMARKS

Claims 1-30 are pending. Claims 1, 10-11, 14, 17-18, 26-27, and 30. No new matter is added by these amendments; support can be found generally in the specification and in at least paragraph [0060]. Applicant submits that all claims are in condition for allowance, and a notice to that effect is respectfully requested.

Claims 1-30 stand rejected under the ground of non-statutory double patenting over claims 1-40 of US Patent Application No. 12/896993 (US Pat. 9497001). To expedite prosecution, Applicant has submitted an electronic terminal disclaimer to overcome the rejection.

Respectfully submitted,
COATS & BENNETT, P.L.L.C.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Table with 7 columns: APPLN. TYPE, ENTITY STATUS, ISSUE FEE DUE, PUBLICATION FEE DUE, PREV. PAID ISSUE FEE, TOTAL FEE(S) DUE, DATE DUE

nonprovisional UNDISCOUNTED \$960 \$0 \$0 \$960 10/05/2017

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
 Commissioner for Patents
 P.O. Box 1450
 Alexandria, Virginia 22313-1450
 or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

24112 7590 07/05/2017
 COATS & BENNETT, PLLC
 1400 Crescent Green, Suite 300
 Cary, NC 27518

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

- Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.
- "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. **Use of a Customer Number is required.**

2. For printing on the patent front page, list

- (1) The names of up to 3 registered patent attorneys or agents OR, alternatively, 1 _____
- (2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed. 2 _____
- 3 _____

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE _____ (B) RESIDENCE: (CITY and STATE OR COUNTRY) _____

Please check the appropriate assignee category or categories (will not be printed on the patent): Individual Corporation or other private group entity Government

4a. The following fee(s) are submitted:
 Issue Fee
 Publication Fee (No small entity discount permitted)
 Advance Order - # of Copies _____

4b. Payment of Fee(s): (**Please first reapply any previously paid issue fee shown above**)
 A check is enclosed.
 Payment by credit card. Form PTO-2038 is attached.
 The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number _____ (enclose an extra copy of this form).

5. **Change in Entity Status** (from status indicated above)
 Applicant certifying micro entity status. See 37 CFR 1.29
 Applicant asserting small entity status. See 37 CFR 1.27
 Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.
NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.
NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Allowability	Application No. 15/350,360	Applicant(s) ASTELY ET AL.	
	Examiner MD TALUKDER	Art Unit 2648	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. This communication is responsive to 5/24/2017.
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.
2. An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.
3. The allowed claim(s) is/are 1-30. As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.
4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

- a) All b) Some *c) None of the:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

/MD TALUKDER/
Primary Examiner, Art Unit 2648

1. The present application is being examined under the pre-AIA first to invent provisions.

REASONS FOR ALLOWANCE

2. Claims 1-30 are allowed over the prior art of record. Interpreting the claims in light of the specification. The following is an examiner's statement of reasons for allowance: Interpreting the claims in light of the specification. Claims has been found allowable because the prior art of record, does not teach, suggest or disclose "scheduling downlink transmissions to a first user terminal only on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell; receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal[s] scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal[s] scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell" in combination with the rest of the limitations of the claim. The prior art of the record discloses a communication method between access point and a user station in a specific cell but does not disclose each and every aspect of the above limitation. Any comments considered necessary by applicant must be

submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MD TALUKDER whose telephone number is (571)270-3222. The examiner can normally be reached on Monday to Friday from (9:30 to 4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wesley Kim can be reached on 571-272-7867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

**REQUEST FOR CONTINUED EXAMINATION(RCE)TRANSMITTAL
 (Submitted Only via EFS-Web)**

Application Number	15350360	Filing Date	2016-11-14	Docket Number (if applicable)	4015-9600 / P30138-US3	Art Unit	2648
First Named Inventor	Astely			Examiner Name	Md K. Talukder		

This is a Request for Continued Examination (RCE) under 37 CFR 1.114 of the above-identified application.
 Request for Continued Examination (RCE) practice under 37 CFR 1.114 does not apply to any utility or plant application filed prior to June 8, 1995, or to any design application. The Instruction Sheet for this form is located at WWW.USPTO.GOV

SUBMISSION REQUIRED UNDER 37 CFR 1.114

Note: If the RCE is proper, any previously filed unentered amendments and amendments enclosed with the RCE will be entered in the order in which they were filed unless applicant instructs otherwise. If applicant does not wish to have any previously filed unentered amendment(s) entered, applicant must request non-entry of such amendment(s).

- Previously submitted. If a final Office action is outstanding, any amendments filed after the final Office action may be considered as a submission even if this box is not checked.
- Consider the arguments in the Appeal Brief or Reply Brief previously filed on _____
- Other _____
- Enclosed
- Amendment/Reply
- Information Disclosure Statement (IDS)
- Affidavit(s)/ Declaration(s)
- Other _____

MISCELLANEOUS

- Suspension of action on the above-identified application is requested under 37 CFR 1.103(c) for a period of months _____
 (Period of suspension shall not exceed 3 months; Fee under 37 CFR 1.17(i) required)
- Other _____

FEES

- The RCE fee under 37 CFR 1.17(e) is required by 37 CFR 1.114 when the RCE is filed.**
- The Director is hereby authorized to charge any underpayment of fees, or credit any overpayments, to Deposit Account No 181167

Doc description: Request for Continued Examination (RCE)

PTO/SB/30EFS (07-09)

Approved for use through 07/31/2012. OMB 0651-0031
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

Signature of Registered U.S. Patent Practitioner			
Signature	David E. Bennett, Reg. No. 32194/	Date (YYYY-MM-DD)	2017-09-14
Name	David E. Bennett	Registration Number	32194

This collection of information is required by 37 CFR 1.114. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PRELIMINARY AMENDMENT

This paper is being filed accompanying a Request for Continued Examination. The requisite fee of \$1,200 is submitted for filing the Request for Continued Examination. Reconsideration is respectfully requested in light of the amendments and/or remarks below. The Office is hereby authorized to charge any fees required for entry of this paper to Deposit Account 18-1167.

CLAIMS LISTING

1. (Previously Presented) A method implemented by a base station of receiving control information from a user terminal, the method comprising:
 - scheduling downlink transmissions to a first user terminal only on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;
 - receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and
 - receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

2. (Previously Presented) The method of claim 1, wherein the first and second sets of radio resources are different.

3. (Previously Presented) The method of claim 2, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.

4. (Previously Presented) The method of claim 1, further comprising transmitting control information to the first user terminal to explicitly indicate the first set of radio resources on the uplink component carrier associated with the primary cell.

5. (Previously Presented) The method of claim 1, further comprising providing the first user terminal with an implicit indication to dynamically assign radio resources in said first set of radio resources.

6. (Previously Presented) The method of claim 5, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) used for scheduling the first user terminal.

7. (Previously Presented) The method of claim 1, further comprising transmitting control information to the second user terminal on a downlink component carrier to implicitly or explicitly indicate the second set of radio resources on the uplink component carrier associated with the primary cell.

8. (Previously Presented) The method of claim 7, wherein at least one of the first and second sets of radio resources is indicated explicitly by an uplink control channel resource index.

9. (Previously Presented) The method of claim 8, wherein an explicit indication related to the second set of radio resources is transmitted as radio resource control signaling.

10. (Previously Presented) The method of claim 1, further comprising transmitting, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

11. (Previously Presented) The method of claim 10, wherein the assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources to the second user terminal when the second user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

12. (Previously Presented) The method of claim 11, wherein the acknowledgement resource indication selects radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources.

13. (Previously Presented) The method of claim 1, further comprising:
receiving control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

14. (Previously Presented) The method of claim 1, further comprising:
if the first user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier associated with a non-primary cell, receiving control information associated with the downlink transmissions to the first user terminal on the second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on the second single downlink component carrier.
15. (Previously Presented) The method of claim 1, wherein the first user equipment is the same as the second user equipment.
16. (Previously Presented) The method of claim 1, wherein the first user equipment is different from the second user equipment.
17. (Previously Presented) A base station comprising:
a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and
a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:
schedule downlink transmissions to the first user terminal only on a single downlink component carrier associated with a primary cell and schedule downlink transmissions to the second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;

receive, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and

receive, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

18. (Previously Presented) A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:

receiving an assignment of radio resources for downlink transmissions from a base station;

transmitting, on a first set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and

transmitting, on a second set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmission, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

19. (Previously Presented) The method of claim 18, wherein the first and second sets of radio resources are different.

20. (Previously Presented) The method of claim 19, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.

21. (Previously Presented) The method of claim 18, further comprising receiving control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.

22. (Previously Presented) The method of claim 21, wherein said receiving the control information comprises receiving an uplink control channel resource index explicitly indicating said first set of radio resources.

23. (Previously Presented) The method of claim 22, wherein an explicit indication relating to the second set of radio resources is received as radio resource control signaling.

24. (Previously Presented) The method of claim 18, further comprising receiving an implicit indication to dynamically assign radio resources in said first set of radio resources.

25. (Previously Presented) The method of claim 24, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.

26. (Previously Presented) The method of claim 18, further comprising receiving, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

27. (Previously Presented) The method of claim 26, wherein the assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
28. (Previously Presented) The method of claim 27, further comprising selecting radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.
29. (Previously Presented) The method of claim 18, further comprising:
transmitting control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.
30. (Previously Presented) A user terminal for mobile communications, the user terminal comprising:
a receiver to receive downlink transmissions from a base station;
a transmitter to transmit control information associated with the downlink transmission to a base station; and
a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to:

select a first set of radio resources responsive to being assigned radio resources only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and select a second set of radio resources responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmissions, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

31. (New) The user terminal of claim 30, wherein the controller is further configured to select, as the second set of radio resources, a set of radio resources different than the first set of radio resources.

32. (New) The user terminal of claim 31, wherein the controller is further configured to select, as the second set of radio resources, additional resources as compared to the first set of radio resources.

33. (New) The user terminal of claim 30, wherein the controller is further configured to receive control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.

34. (New) The user terminal of claim 33, wherein the controller is further configured to receive, as the control information, an uplink control channel resource index explicitly indicating said first set of radio resources.

35. (New) The user terminal of claim 34, wherein the controller is further configured to receive radio resource control signaling including an explicit indication relating to the second set of radio resources.

36. (New) The user terminal of claim 30, wherein the controller is further configured to receive an implicit indication to dynamically assign radio resources in said first set of radio resources.

37. (New) The user terminal of claim 36, wherein the implicit indication comprises a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.

38. (New) The user terminal of claim 30, wherein the controller is further configured to receive, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

39. (New) The user terminal of claim 26, wherein the assignment of radio resources in said second set of radio resources comprises an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

40. (New) The user terminal of claim 27, wherein the controller is further configured to select radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.

41. (New) The user terminal of claim 18, wherein the controller is further configured to transmit control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

REMARKS

In the Notice of Allowance dated July 5, 2017, the Examiner indicated that claims 1-30 were allowable. New claims 31-41 have been added. The new claims all depend directly or indirectly from independent claim 30, which was deemed to be allowable over the prior art of record. New claims 31-41 correspond to allowed dependent claims 19-29, which were also deemed to be allowable. Therefore, it is respectfully submitted that the application is in condition for allowance.

Respectfully submitted,
COATS & BENNETT, P.L.L.C.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

SUPPLEMENTAL PRELIMINARY AMENDMENT ACCOMPANYING RCE

This paper is being filed as a supplemental preliminary amendment to the Request for Continued Examination (RCE) filed 14 September 2017. Reconsideration is respectfully requested in light of the amendments and/or remarks below. It is believed that no fees are due at this time, however, the Office is hereby authorized to charge any fees required for entry of this paper to Deposit Account 18-1167.

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0045] with the following amended paragraph:

[0045] Both PUCCH format 1 and format 2 signaling messages are transmitted on a resource-block pair with one resource block in each slot. The resource-block pair is determined from the PUCCH resource index. Thus, the resource-block number to use in the first and second slot of a subframe can be expressed as:

Please replace paragraph [0065] with the following amended paragraph:

[0065] Fig. 9 illustrates an exemplary method 50 implemented by a base station 20 in a communication network 10 of receiving uplink control information from a user terminal 100 depending ~~on~~ on the assignment of downlink component carriers. The base station 20 schedules the user terminal 100 to receive downlink transmissions on one or more downlink component carriers (block 52). The user terminal 100 may be scheduled to receive downlink transmissions on a single downlink component carrier associated with a primary uplink component carrier. In this case, the base station 20 receives control information associated with the downlink transmissions to the user terminal 100 on a first set of radio resources on the uplink primary component carrier (block 54). Alternatively, the user terminal 100 may be scheduled to receive downlink transmissions on multiple downlink component carriers, or on a single downlink component carrier other than the downlink component carrier associated with the uplink primary component carrier. In this alternative case, the base station 20 receives uplink control information associated with the downlink transmissions from the user terminal 100 on a second set of radio resources on the uplink component carrier (block 56).

Please replace paragraph [0066] with the following amended paragraph:

[0066] Fig. 10 illustrates an exemplary method 60 implemented by a user terminal of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 62). If the user terminal 100 detects assignments of radio resources for a single downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on an uplink primary component carrier, uplink control information associated with the downlink transmissions (block 64). On the other ~~hands~~ hand, if the user terminal 100 receives assignments for multiple downlink component carriers, the user terminal 100 transmits, on a second set of radio resources on the uplink primary component carrier, uplink control information associated with downlink transmissions (block 66).

Please replace paragraph [0067] with the following amended paragraph:

[0067] Fig. 11 illustrates another exemplary method 70 implemented by a user terminal 100 of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 72). If the user terminal 100 detects assignments of radio resources for a first downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on a uplink primary component carrier, uplink control information associated with the downlink transmissions (block 74). On the other ~~hands~~ hand, if the user terminal 100 receives assignments for a second downlink component carrier, the user terminal 100 transmits, on a second set of radio resources on the primary uplink component carrier, uplink control information associated with downlink transmissions (block 76).

REMARKS

Paragraphs 45, 65, 66 and 67 in the Specification have been amended to correct minor typographical errors. No new matter had been added therefore, it is respectfully submitted that the application is in condition for allowance.

Respectfully submitted,
COATS & BENNETT, P.L.L.C.

TITLE OF INVENTION: PUCCH RESOURCE ALLOCATION FOR CARRIER AGGREGATION IN LTE-ADVANCED

Table with 7 columns: APPLN. TYPE, ENTITY STATUS, ISSUE FEE DUE, PUBLICATION FEE DUE, PREV. PAID ISSUE FEE, TOTAL FEE(S) DUE, DATE DUE

nonprovisional UNDISCOUNTED \$960 \$0 \$0 \$960 01/24/2018

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
 Commissioner for Patents
 P.O. Box 1450
 Alexandria, Virginia 22313-1450
 or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

24112 7590 10/24/2017
 COATS & BENNETT, PLLC
 1400 Crescent Green, Suite 300
 Cary, NC 27518

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

- Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.
- "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. **Use of a Customer Number is required.**

2. For printing on the patent front page, list

- (1) The names of up to 3 registered patent attorneys or agents OR, alternatively, 1 _____
- (2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed. 2 _____
- 3 _____

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE _____

(B) RESIDENCE: (CITY and STATE OR COUNTRY) _____

Please check the appropriate assignee category or categories (will not be printed on the patent): Individual Corporation or other private group entity Government

4a. The following fee(s) are submitted:

- Issue Fee
- Publication Fee (No small entity discount permitted)
- Advance Order - # of Copies _____

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

- A check is enclosed.
- Payment by credit card. Form PTO-2038 is attached.
- The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number _____ (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

- Applicant certifying micro entity status. See 37 CFR 1.29
- Applicant asserting small entity status. See 37 CFR 1.27
- Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

ART UNIT PAPER NUMBER

2648

DATE MAILED: 10/24/2017

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Allowability	Application No. 15/350,360	Applicant(s) ASTELY ET AL.	
	Examiner MD TALUKDER	Art Unit 2648	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. This communication is responsive to 09/14/2017.
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.
2. An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.
3. The allowed claim(s) is/are 1-41. As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.
4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
Certified copies:
a) All b) Some *c) None of the:
1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).
* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

4. <input type="checkbox"/> Interview Summary (PTO-413), Paper No./Mail Date _____	

/MD TALUKDER/ Primary Examiner, Art Unit 2648	
--	--

1. The present application is being examined under the pre-AIA first to invent provisions.

REASONS FOR ALLOWANCE

2. Claims 1-41 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance: Interpreting the claims in light of the specification. Claims has been found allowable because the prior art of record, does not teach, suggest or disclose "scheduling downlink transmissions to a first user terminal only on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell; receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell" in combination with the rest of the limitations of the claim. The prior art of the record discloses a communication method between access point and a user station in a specific cell but does not disclose each and every aspect of the above limitation. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee

and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MD TALUKDER whose telephone number is (571)270-3222.

The examiner can normally be reached on Monday to Friday from (9:30 to 4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wesley Kim can be reached on 571-272-7867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

AMENDMENT PURSUANT TO 37 CFR § 1.312

This paper is being filed in response to the Notice of Allowance mailed 24 October 2017. Applicant timely submits this amendment pursuant to 37 CFR § 1.312. Entry of the following amendments to the Specification and consideration of the remarks below is respectfully requested. The Office is hereby authorized to charge any fees required for entry of this paper to Deposit Account 18-1167.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

REMARKS

No claims are amended. A full claim set is provided solely for convenience.

Paragraphs 45, 65, 66 and 67 in the Specification have been amended to correct minor typographical errors. No new matter had been added. Entry of these amendments is requested under 37 C.F.R. §1.312. Applicant respectfully submits that the present application is now in condition to proceed to issue. It is unclear whether the amendment filed 17 October 2017 has been entered since it is not mentioned in the Notice of Allowance. If it has been entered, please ignore this §1.312 amendment.

Respectfully submitted,
COATS & BENNETT, P.L.L.C.

CLAIMS LISTING

1. (Previously Presented) A method implemented by a base station of receiving control information from a user terminal, the method comprising:

scheduling downlink transmissions to a first user terminal only on a single downlink component carrier associated with a primary cell and scheduling downlink transmissions to a second user terminal on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell;

receiving, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and

receiving, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

2. (Previously Presented) The method of claim 1, wherein the first and second sets of radio resources are different.

3. (Previously Presented) The method of claim 2, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.

4. (Previously Presented) The method of claim 1, further comprising transmitting control information to the first user terminal to explicitly indicate the first set of radio resources on the uplink component carrier associated with the primary cell.

5. (Previously Presented) The method of claim 1, further comprising providing the first user terminal with an implicit indication to dynamically assign radio resources in said first set of radio resources.

6. (Previously Presented) The method of claim 5, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) used for scheduling the first user terminal.

7. (Previously Presented) The method of claim 1, further comprising transmitting control information to the second user terminal on a downlink component carrier to implicitly or explicitly indicate the second set of radio resources on the uplink component carrier associated with the primary cell.

8. (Previously Presented) The method of claim 7, wherein at least one of the first and second sets of radio resources is indicated explicitly by an uplink control channel resource index.

9. (Previously Presented) The method of claim 8, wherein an explicit indication related to the second set of radio resources is transmitted as radio resource control signaling.
10. (Previously Presented) The method of claim 1, further comprising transmitting, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the second user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
11. (Previously Presented) The method of claim 10, wherein the assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources to the second user terminal when the second user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.
12. (Previously Presented) The method of claim 11, wherein the acknowledgement resource indication selects radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources.
13. (Previously Presented) The method of claim 1, further comprising:
receiving control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

14. (Previously Presented) The method of claim 1, further comprising:
if the first user terminal is scheduled to receive downlink transmissions on a second single downlink component carrier associated with a non-primary cell, receiving control information associated with the downlink transmissions to the first user terminal on the second set of radio resources on the uplink component carrier associated with the primary cell, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on the second single downlink component carrier.

15. (Previously Presented) The method of claim 1, wherein the first user equipment is the same as the second user equipment.

16. (Previously Presented) The method of claim 1, wherein the first user equipment is different from the second user equipment.

17. (Previously Presented) A base station comprising:
a transmitter to transmit user data on one or more downlink component carriers to a first user terminal and a second user terminal; and
a controller to schedule downlink transmissions to the first user terminal and the second user terminal, the controller configured to:
schedule downlink transmissions to the first user terminal only on a single downlink component carrier associated with a primary cell and schedule downlink transmissions to the second user terminal on multiple downlink

component carriers or on a downlink component carrier associated with a non-primary cell;

receive, on a first set of radio resources, control information associated with the downlink transmissions to the first user terminal, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions only on a single downlink component carrier associated with the primary cell; and

receive, on a second set of radio resources, control information associated with the downlink transmissions to the second user terminal, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

18. (Previously Presented) A method implemented by a user terminal of transmitting control information in a mobile communication network, the method comprising:

receiving an assignment of radio resources for downlink transmissions from a base station;

transmitting, on a first set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and

transmitting, on a second set of radio resources, control information associated with the downlink transmissions responsive to being assigned radio resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink transmission, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on a same uplink component carrier associated with the primary cell.

19. (Previously Presented) The method of claim 18, wherein the first and second sets of radio resources are different.

20. (Previously Presented) The method of claim 19, wherein the second set of radio resources are additional resources as compared to the first set of radio resources.
21. (Previously Presented) The method of claim 18, further comprising receiving control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.
22. (Previously Presented) The method of claim 21, wherein said receiving the control information comprises receiving an uplink control channel resource index explicitly indicating said first set of radio resources.
23. (Previously Presented) The method of claim 22, wherein an explicit indication relating to the second set of radio resources is received as radio resource control signaling.
24. (Previously Presented) The method of claim 18, further comprising receiving an implicit indication to dynamically assign radio resources in said first set of radio resources.
25. (Previously Presented) The method of claim 24, wherein the implicit indication is a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.

26. (Previously Presented) The method of claim 18, further comprising receiving, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

27. (Previously Presented) The method of claim 26, wherein the assignment of radio resources in said second set of radio resources is an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

28. (Previously Presented) The method of claim 27, further comprising selecting radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.

29. (Previously Presented) The method of claim 18, further comprising:
transmitting control signaling on the second set of radio resources if radio resources on
a single downlink component carrier associated with a non-primary cell are assigned
for the downlink transmissions.

30. (Previously Presented) A user terminal for mobile communications, the user terminal comprising:

a receiver to receive downlink transmissions from a base station;

a transmitter to transmit control information associated with the downlink transmission to a base station; and

a controller to select radio resources for transmission of control information associated with the downlink transmissions, the controller configured to:

select a first set of radio resources responsive to being assigned radio resources

only on a single downlink component carrier associated with the primary cell for the downlink transmission, wherein the first set of radio resources is

reserved for a user terminal scheduled to receive downlink transmissions on a single downlink component carrier associated with the primary cell; and

select a second set of radio resources responsive to being assigned radio

resources on multiple downlink component carriers or on a downlink component carrier associated with a non-primary cell for the downlink

transmissions, wherein the second set of radio resources is reserved for a user terminal scheduled to receive downlink transmissions on multiple

downlink component carriers or on a downlink component carrier associated with a non-primary cell, the first and second sets of radio resources being on

a same uplink component carrier associated with the primary cell.

31. (Previously Presented) The user terminal of claim 30, wherein the controller is further configured to select, as the second set of radio resources, a set of radio resources different than the first set of radio resources.

32. (Previously Presented) The user terminal of claim 31, wherein the controller is further configured to select, as the second set of radio resources, additional resources as compared to the first set of radio resources.

33. (Previously Presented) The user terminal of claim 30, wherein the controller is further configured to receive control information from the base station explicitly indicating the first set of radio resources on the uplink component carrier associated with the primary cell.

34. (Previously Presented) The user terminal of claim 33, wherein the controller is further configured to receive, as the control information, an uplink control channel resource index explicitly indicating said first set of radio resources.

35. (Previously Presented) The user terminal of claim 34, wherein the controller is further configured to receive radio resource control signaling including an explicit indication relating to the second set of radio resources.

36. (Previously Presented) The user terminal of claim 30, wherein the controller is further configured to receive an implicit indication to dynamically assign radio resources in said first set of radio resources.

37. (Previously Presented) The user terminal of claim 36, wherein the implicit indication comprises a control channel element (CCE) of a Physical Downlink Control Channel (PDCCH) on which the assignment of radio resources for downlink transmissions is received.

38. (Previously Presented) The user terminal of claim 30, wherein the controller is further configured to receive, on the single downlink component carrier, an assignment of radio resources in the second set of radio resources when the user terminal is scheduled to receive the downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

39. (Previously Presented) The user terminal of claim 26, wherein the assignment of radio resources in said second set of radio resources comprises an acknowledgement resource indication to dynamically assign radio resources in when the user terminal is scheduled to receive downlink transmissions on the multiple downlink component carriers or on the downlink component carrier associated with the non-primary cell.

40. (Previously Presented) The user terminal of claim 27, wherein the controller is further configured to select radio resources in the second set of radio resources, which is a semi-statically configured set of uplink resources, responsive to the acknowledgement resource indication.

41. (Previously Presented) The user terminal of claim 18, wherein the controller is further configured to transmit control signaling on the second set of radio resources if radio resources on a single downlink component carrier associated with a non-primary cell are assigned for the downlink transmissions.

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0045] with the following amended paragraph:

[0045] Both PUCCH format 1 and format 2 signaling messages are transmitted on a resource-block pair with one resource block in each slot. The resource-block pair is determined from the PUCCH resource index. Thus, the resource-block number to use in the first and second slot of a subframe can be expressed as:

Please replace paragraph [0065] with the following amended paragraph:

[0065] Fig. 9 illustrates an exemplary method 50 implemented by a base station 20 in a communication network 10 of receiving uplink control information from a user terminal 100 depending ~~on~~ on the assignment of downlink component carriers. The base station 20 schedules the user terminal 100 to receive downlink transmissions on one or more downlink component carriers (block 52). The user terminal 100 may be scheduled to receive downlink transmissions on a single downlink component carrier associated with a primary uplink component carrier. In this case, the base station 20 receives control information associated with the downlink transmissions to the user terminal 100 on a first set of radio resources on the uplink primary component carrier (block 54). Alternatively, the user terminal 100 may be scheduled to receive downlink transmissions on multiple downlink component carriers, or on a single downlink component carrier other than the downlink component carrier associated with the uplink primary component carrier. In this alternative case, the base station 20 receives uplink control information associated with the downlink transmissions from the user terminal 100 on a second set of radio resources on the uplink component carrier (block 56).

Please replace paragraph [0066] with the following amended paragraph:

[0066] Fig. 10 illustrates an exemplary method 60 implemented by a user terminal of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 62). If the user terminal 100 detects assignments of radio resources for a single downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on an uplink primary component carrier, uplink control information associated with the downlink transmissions (block 64). On the other ~~hands~~ hand, if the user terminal 100 receives assignments for multiple downlink component carriers, the user terminal 100 transmits, on a second set of radio resources on the uplink primary component carrier, uplink control information associated with downlink transmissions (block 66).

Please replace paragraph [0067] with the following amended paragraph:

[0067] Fig. 11 illustrates another exemplary method 70 implemented by a user terminal 100 of transmission of uplink control signaling to a base station 20. The user terminal 100 receives a radio resource assignment for a downlink transmission from the base station 20 (block 72). If the user terminal 100 detects assignments of radio resources for a first downlink component carrier, the user terminal 100 transmits, on a first set of radio resources on a uplink primary component carrier, uplink control information associated with the downlink transmissions (block 74). On the other ~~hands~~ hand, if the user terminal 100 receives assignments for a second downlink component carrier, the user terminal 100 transmits, on a second set of radio resources on the primary uplink component carrier, uplink control information associated with downlink transmissions (block 76).

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
 or **Fax** (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

24112 7590 10/24/2017
COATS & BENNETT, PLLC
 1400 Crescent Green, Suite 300
 Cary, NC 27518

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

- Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.
- "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. **Use of a Customer Number is required.**

2. For printing on the patent front page, list

- (1) The names of up to 3 registered patent attorneys or agents OR, alternatively,
- (2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed.

1 COATS & BENNETT, PLLC
 2 _____
 3 _____

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

TELEFONAKTIEBOLAGET LM ERICSSON (PUBL)

STOCKHOLM, SWEDEN

Please check the appropriate assignee category or categories (will not be printed on the patent): Individual Corporation or other private group entity Government

4a. The following fee(s) are submitted:

- Issue Fee
- Publication Fee (No small entity discount permitted)
- Advance Order - # of Copies _____

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

- A check is enclosed.
- Payment by credit card. Form PTO-2038 is attached.
- The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number 181167 (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

- Applicant certifying micro entity status. See 37 CFR 1.29
- Applicant asserting small entity status. See 37 CFR 1.27
- Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

David Astely, Bromma, SWEDEN;
Telefonaktiebolaget LM Ericsson (publ), Stockholm, SWEDEN;
Robert Baldemair, Solna, SWEDEN;
Dirk Gerstenberger, Stockholm, SWEDEN;
Daniel Larsson, Stockholm, SWEDEN;
Lars Lindbom, Karlstad, SWEDEN;
Stefan Parkvall, Bromma, SWEDEN;

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. To learn more about why the USA is the best country in the world to develop technology, manufacture products, and grow your business, visit SelectUSA.gov.

UNITED STATES PATENT AND TRADEMARK OFFICE CERTIFICATE OF CORRECTION

Page 1 of 2

PATENT NO. : 9,860,044 B2
APPLICATION NO. : 15/350,360
ISSUE DATE : January 2, 2018
INVENTOR(S) : Astely, et al.

It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

On the Face Page, in Field (63), under "Related U.S. Application Data", in Column 1, Line 2, delete "Oct. 14, 2010," and insert - - Oct. 4, 2010, - -, therefor.

In Column 4, Line 14, delete "terminals" and insert - - terminals. - -, therefor.

In Column 5, Line 32, delete "(ACK/NACK" and insert - - (ACK/NACK) - -, therefor.

In Column 6, Line 57, delete "specifications" and insert - - specifications. - -, therefor.

In Column 10, Line 13, delete "PDDCH" and insert - - PDCCH - -, therefor.

In Column 15, Line 34, in Claim 27, delete "in when" and insert - - when - -, therefor.

In Column 15, Line 38, in Claim 28, delete "The user terminal of claim" and insert - - The method of claim - -, therefor.

In Column 15, Line 41, in Claim 28, delete "in when" and insert - - when - -, therefor.

MAILING ADDRESS OF SENDER (Please do not use customer number below):

6300 Legacy, MS EVR 1-C-11
Plano, TX 75024
972-583-8656

This collection of information is required by 37 CFR 1.322, 1.323, and 1.324. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1.0 hour to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: **Attention Certificate of Corrections Branch, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

37 CFR 1.322 & 37 CFR 1.323 REQUEST FOR CERTIFICATE OF CORRECTION
FOR USPTO AND/OR APPLICANT MISTAKE

HONORABLE COMMISSIONER OF PATENTS & TRADEMARKS

SIR:

The following is a request for a certificate of correction in Serial Number 15/350,360, now Patent Number 9,860,044.

A certificate of correction under 35 USC 254 is respectfully requested in the above-identified patent.

The errors were the fault of both the applicant and USPTO and, accordingly, please charge **\$150.00** to our Deposit Account No. 50-1379. In the event that a further fee is required, please charge the amount to the same Deposit Account.

The exact locations where the errors appear in the patent and patent application are as follows:

On the Face Page, in Field (63), under “Related U.S. Application Data”, in Column 1, Line 2, delete “Oct. 14, 2010,” and insert - - Oct. 4, 2010, - -, therefor. (BIBLIOGRAPHIC DATA SHEET DATED OCTOBER 24, 2017, PAGE 1 OF 1 (PAGE 35 OF FW), UNDER “CONTINUING DATA”, LINE 1)

In Column 4, Line 14, delete “terminals” and insert - - terminals. - -, therefor. (ORIGINALLY FILED SPECIFICATION DATED NOVEMBER 14, 2016, PAGE 5, PARAGRAPH [0024], LINE 3)

In Column 5, Line 32, delete “(ACK/NACK)” and insert - - (ACK/NACK) - -, therefor. (ORIGINALLY FILED SPECIFICATION DATED NOVEMBER 14, 2016, PAGE 7, PARAGRAPH [0031], LINE 4)

In Column 6, Line 57, delete “specifications” and insert - - specifications. - -, therefor. (ORIGINALLY FILED SPECIFICATION DATED NOVEMBER 14, 2016, PAGE 9, PARAGRAPH [0038], LINE 10)

In Column 10, Line 13, delete “PDDCH” and insert - - PDCCH - -, therefor. (ORIGINALLY FILED SPECIFICATION DATED NOVEMBER 14, 2016, PAGE 14, LINE 9)

In Column 15, Line 34, in Claim 27, delete “in when” and insert - - when - -, therefor. (AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017, PAGE 11 OF 15, CLAIM 27, LINE 3)

In Column 15, Line 38, in Claim 28, delete “The user terminal of claim” and insert - - The method of claim - -, therefor. (AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017, PAGE 14 OF 15, CLAIM 39, LINE 1)

In Column 15, Line 41, in Claim 28, delete “in when” and insert - - when - -, therefor. (AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017, PAGE 14 OF 15, CLAIM 39, LINE 3)

In Column 15, Line 49, in Claim 30, delete “The user terminal of claim” and insert - - The method of claim - -, therefor. (AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017, PAGE 14 OF 15, CLAIM 40, LINE 1)

In Column 15, Line 59, in Claim 32, delete “The user terminal of claim” and insert - - The method of claim - -, therefor.
(AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017,
PAGE 14 OF 15, CLAIM 41, LINE 1)

In Column 15, Line 59, in Claim 32, delete “wherein he” and insert - - wherein the - -, therefor.
(AMENDMENTS TO THE CLAIMS DATED NOVEMBER 10, 2017,
PAGE 14 OF 15, CLAIM 41, LINE 1)

The requested corrections are attached on Form PTO 1050.

Respectfully Submitted

, 2018

<p>This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.</p> <p><u>New Applications Under 35 U.S.C. 111</u> If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.</p> <p><u>National Stage of an International Application under 35 U.S.C. 371</u> If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.</p> <p><u>New International Application Filed with the USPTO as a Receiving Office</u> If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.</p>					

UNITED STATES PATENT AND TRADEMARK OFFICE
CERTIFICATE OF CORRECTION

PATENT NO. : 9,860,044 B2
APPLICATION NO. : 15/350360
DATED : January 2, 2018
INVENTOR(S) : Astely et al.

Page 1 of 2

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

On the Title Page

In Item (63), under "Related U.S. Application Data", in Column 1, Line 2, delete "Oct. 14, 2010," and insert -- Oct. 4, 2010, --, therefor.

In the Specification

In Column 4, Line 14, delete "terminals" and insert -- terminals. --, therefor.

In Column 5, Line 32, delete "(ACK/NACK" and insert -- (ACK/NACK) --, therefor.

In Column 6, Line 57, delete "specifications" and insert -- specifications. --, therefor.

In Column 10, Line 13, delete "PDDCH" and insert -- PDCCH --, therefor.

In the Claims

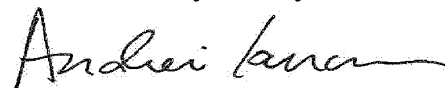

In Column 15, Line 34, in Claim 27, delete "in when" and insert -- when --, therefor.

In Column 15, Line 38, in Claim 28, delete "The user terminal of claim" and insert -- The method of claim --, therefor.

In Column 15, Line 41, in Claim 28, delete "in when" and insert -- when --, therefor.

In Column 15, Line 49, in Claim 30, delete "The user terminal of claim" and insert -- The method of claim --, therefor.

Signed and Sealed this
Tenth Day of July, 2018

Andrei Iancu
Director of the United States Patent and Trademark Office

CERTIFICATE OF CORRECTION (continued)
U.S. Pat. No. 9,860,044 B2

Page 2 of 2

In Column 15, Line 59, in Claim 32, delete “The user terminal of claim” and insert -- The method of claim --, therefor.

In Column 15, Line 59, in Claim 32, delete “wherein he” and insert -- wherein the --, therefor.
