IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF MINNESOTA

OXYGENATOR WATER TECHNOLOGIES, INC.

Plaintiff,

Civil Action No. 0:20-cv-00358

(ECT/HB)

TENNANT COMPANY

v.

Defendant.

SUPPLEMENTAL JOINT PATENT CASE STATUS REPORT AND CLAIM CONSTRUCTION STATEMENT

Pursuant to the Pretrial Scheduling Order (ECF No. 43, modified by ECF No. 62), Plaintiff Oxygenator Water Technologies, Inc. ("OWT") and Defendant Tennant Company ("Tennant") jointly submit this Supplemental Joint Patent Case Status Report and Claim Construction Statement to correct errors regarding specific terms in the Joint Claim Construction Statement filed on April 9, 2021. (ECF No. 64.) Specifically, the tables in sections C and D of that Joint Claim Construction Statement included errors that are corrected by the below redlines. The parties agree that the remainder of the Joint Patent Case Status Report and Claim Construction Statement filed on April 9, 2021 shall remain in effect (subject to the Court's Briefing Order at ECF No. 68).

C. Agreed Claim Constructions

Term(s)/Phrase(s)	Patent Claim(s)	Agreed Claim Construction
"a suspension comprising oxygen microbubbles and nanobubbles"	'415 Patent, Claim 13	A mixture including microbubbles and nanobubbles that are dispersed within but undissolved in the water.

"microbubble"	'415 Patent, Claims 13, 19, 20, 21, 22, 25; '092 Patent, Claim 23	A bubble with a diameter less than 50 microns.
"critical distance"	'415 Patent, Claim 13	The distance separating the anode and cathode at which evolved oxygen forms microbubbles and nanobubbles.
"aquarium reservoir container"	'415 Patent, Claim 20	A container designed for keeping fish or other live aquatic creatures.
"supersaturate"	'415 Patent, Claim 21	Causing water to have oxygen at a higher concentration than normal calculated oxygen solubility at a particular temperature and pressure.
"concave"	'092 Patent, Claim 64	Curved inward.
"radial direction relative to the longitudinal center axis"	'092 Patent, Claim 65	A direction perpendicular to the longitudinal center axis.

D. Terms for Construction

Claim Term, Phrase, or Clause	Patent Claim(s)	OWT Proposed Construction	Tennant Proposed Construction
"water"	'415 Patent, Claims 13, 18, 19, 20, 21, 25, 29; '092 Patent, Claims 13, 27, 60; '665 Patent, Claims 13, 55	An aqueous medium that can support the electrolysis of water.	Water means any aqueous medium with resistance less than one ohm per square centimeter, that is, a medium that can support the electrolysis of water. In general, the lower limit of resistance for a medium that can support electrolysis is water containing more than 2000 ppm total dissolved solids.
"conductivity produced by the presence of dissolved solids such	'415 Patent, Claim 13	Plain and ordinary meaning.	To the extent any construction is possible, Tennant relies on the definition provided by

that the water supports plant or animal life"	1005		the applicant wherein he defined how conductivity is produced by the presence of dissolved solids such that the water supports plant or animal life as water that can support electrolysis is "water containing more than 2000 ppm total dissolved solids."
"aqueous medium"	'665 Patent, Claim 55	Plain and ordinary meaning.	a mixture made with water
"oxygenated aqueous composition"	'415 Patent, Claim 13	Plain and ordinary meaning.	a composition of water and oxygen
"tubular housing"	'415 Patent, Claims 13, 26	Plain and ordinary meaning. The term does not require a circular cross section.	an enclosure shaped like a cylinder, hose, or tube
"flowing water through an electrolysis emitter"	'415 Patent, Claim 13	Moving water through an electrolysis emitter by means other than electrolysis.	Placing the emitting device in the fluid to be treated as opposed to using a pipe system
"a flow-through oxygenator"	'092 Patent, Claim 13	An oxygenator configured to connect to a source of flowing water.	Placing the emitting device in the fluid to be treated as opposed to using a pipe system
"deliver electrical current to the electrodes while water flows through the tubular housing"	'665 Patent, Claim 13	Deliver electrical current to the electrodes while moving water through the electrolysis emitter by means other than electrolysis.	Delivering electrical current to the electrodes while the emitting device is in the fluid to be treated as opposed to being used with a pipe system.
"passing water through the tubular housing"	'092 Patent, Claim 13	Moving water through an electrolysis emitter by means other than electrolysis.	Placing the emitting device in the fluid to be treated as opposed to using a pipe system.

T	I	I
'415 Patent, Claim 13 '092 Patent, Claims 13	Electrical and mechanical equipment and their interconnections used to generate and/or convert power.	Plain and ordinary meaning
and 27; '665 Patent, Claim 13		
'415 Patent, Claims 13, 19, 20, 21, 22, 25; '092 Patent, Claim 26	A bubble with a diameter less than that necessary to break the surface tension of water.	Nanobubble means a bubble with a diameter less than necessary to break the surface tension of water. Nanobubbles remain suspended in the water, giving the water an opalescent or milky appearance.
'415 Patent, Claim 25	Plain and ordinary meaning.	Containing nanobubbles.
'415 Patent, Claim 18	Plain and ordinary meaning. The term does not require the temperature be measured or evaluated	The method uses water temperature to determine whether or not a suspension can be formed.
'415 Patent, Claim 19	The microbubbles and nanobubbles remain in the water at least in part for at least several hours.	Where the microbubbles and the nanobubbles remain in water for any period of time up to several hours.
'415 Patent, Claim 20	Plain and ordinary meaning. This claim identifies physical properties of the microbubbles and nanobubbles and identifies a test methodology for determining whether the microbubbles and nanobubbles have that	Claim requires an alleged infringer contain the water with microbubbles and nanobubbles in a two and one half gallon aquarium reservoir container.
	Patent, Claim 13 '092 Patent, Claims 13 and 27; '665 Patent, Claim 13 '415 Patent, Claims 13, 19, 20, 21, 22, 25; '092 Patent, Claim 26 '415 Patent, Claim 25 '415 Patent, Claim 18 '415 Patent, Claim 19	Patent, Claim 13 '092 Patent, Claims 13 and 27; '665 Patent, Claim 13 '415 Patent, Claims 13, 19, 20, 21, 22, 25; '092 Patent, Claim 26 '415 Patent, Claim 26 Plain and ordinary meaning. Claim 18 Plain and ordinary meaning. The term does not require the temperature be measured or evaluated '415 Patent, Claim 19 The microbubbles and nanobubbles remain in the water at least in part for at least several hours. Plain and ordinary meaning. This claim identifies physical properties of the microbubbles and nanobubbles and identifies a test methodology for determining whether the microbubbles and

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
