The LiTL Webbook: A more social computing device

By Rain Noe - November 5, 2009

Like Tweet Share Share

A laptop is, like cell phones and MP3 players, a pretty solitary device; you might show something on any of these things to your friends once in a while, but 99% of the time it's just you in front of it, or vice versa.

LiTL Exhibit 2003

A Boston-based startup called [Litl](#) is releasing a laptop-like device called the Webbook that is, by virtue of its physical design, inherently more social. For starters, it's got a hinge that enables the keyboard to go all the way around, lending it the form factor of an easel.

With its screen exposed, the litl webbook is now ideal for passive or "lean back" web activity like enjoying photos, listening to music, or consuming news, weather, and other web content.

The litl was designed to enhance home web use, with a bright screen featuring a revolutionary 178-degree viewing "cone." Most traditional computers are designed for a single user, but the litl's unique screen technology allows a group of people to clearly view the screen at the same time.

The Webbook also has a scroll-wheel-type-thingy embedded in the hinge, so you can physically change internet "channels," but if you don't feel like using something as antiquated as a physical dial, there's a remote control as well.

Interestingly enough, the device is basically OS-free, at least from a user standpoint--there's no logging in, because the device is always on.

There's no hard drive to crash. And it takes care of its own maintenance, downloading patches and implementing them automatically.

Learn more about the \$699 device [here](#).

RAIN NOE

I'm a lapsed industrial designer. I was born in NYC and figured I'd die there, but a few years ago I abandoned New York to live on a farm in the countryside with

my wife. We have six
dogs.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
